

## Fiber!Fast® Indoor Living Unit (ILU) Solutions

### Description:

Go!Foton's solution for FTTH deployment in existing multi-dwelling unit (MDU) buildings.

Fiber!Fast® is a simple and quick solution to install FTTH services in existing living units. FiberFast™ does not require drilling or the use of mechanical fasteners, staples, or conduits.

Fiber!Fast® is a very small form factor, micro-cable consisting of a durable, 900um transparent drop cable containing ultra bend-insensitive optical fiber (ITU-T G.657.B3). Fiber!Fast® is attached to the wall using micro-clips which are affixed to the wall using adhesive backing. Fiber!Fast® micro-clips secure the micro-cable to the wall surface, and limit bending that may degrade performance..

### Features:

- Easy & Fast Installation by one Technician
- No drilling or mechanical fasteners required
- Highly durable, yet easily removed when needed
- Reliable, Ultra Bend-Insensitive Fiber
- Virtually Invisible Installation
- Clips are tested by Telcordia GR-1221-CORE and VZ-TPR-9459 to meet the highest Performance

Note: Installed fiber may be difficult to see.

### Applications:

- Indoor, Micro-Cable Pathway
- Bring FTTH to existing living units
- Supports Fiber-to-the-Desktop
- Can also be used for schools, hotels, hospitals, or small businesses.

**FiberFast® Components:**

<p><b>Translucent Optical Micro-Cable</b></p> <ul style="list-style-type: none"> <li>• 900um, Tight Buffered Micro-Cable</li> <li>• Ultra Bend-Insensitive Fiber (ITU-T G.657.B3)</li> <li>• Resilient Buffer Material</li> <li>• Highly Durable, Engineered Plastic Sheath</li> <li>• Nearly Invisible Appearance</li> <li>• Paintable if Desired</li> <li>• Flame Retardant</li> </ul>	
<p><b>Adhesive Clips</b></p> <ul style="list-style-type: none"> <li>• Fasten Micro-Cable to any Wall Surface</li> <li>• Proprietary Adhesive Backing</li> <li>• Removable if needed</li> <li>• Will Not Damage Wall Surfaces</li> <li>• Transparent Appearance</li> <li>• Paintable if Desired</li> <li>• Flame Retardant</li> </ul>	
<p><b>Indoor Optical Outlet Box (NIU)</b></p> <ul style="list-style-type: none"> <li>• Easy Installation and Maintenance</li> <li>• Efficient Inner Space Design</li> <li>• Suitable Fiber Bending Radius</li> <li>• Provides Excellent Protection for Optical Fibers</li> <li>• Fire-proof &amp; Dust-proof</li> <li>• Options for Adapters and Pigtails</li> </ul>	

**Ordering Guide:**

PART NUMBER	PRODUCT DESCRIPTION
JXX4B2AM350B	OPTICAL FIBER ILU 0.9MM 350M GR
JA1A1001	ACCESSORY CLIP-A PLASTIC INDOOR (Inside Limiters)
JB1A1001	ACCESSORY CLIP-B PLASTIC INDOOR (Outside Limiters)
JC1A2B	INDOOR OPTICAL OUTLET BOX
