GoFoton

ABOUT

GO!FOTON CORPORATION

Go!Foton is a global supplier of fiber optic network hardware and cable assemblies with a strong presence in optics and photonics. Our growth comes from helping our customers create value with our innovative solutions. Go!Foton brings innovation to the global market with decades of expertise in optics and photonics — solving real-world problems for our customers with a scalable and customized integration approach.

Dual Window Fused Tap Coupler	159
Wavelength Division Multiplexer (WDM) Fused Coupler	162

PEACOC® High Density Fiber Management Platform

Description

Go!Foton is proud to offer a remarkably new and innovative optical fiber patch panel for Telecom and Datacenter applications which require ultra high capacity and density. PEACOC® is Go!Foton's Platform with Enhanced Access for Compact Optical Connectors. It's a revolutionary technology platform that promises to enhance the way data center and telecom operators manage the increasingly complex world of optical connectivity. The Go!Foton PEACOC® technology platform features spreadable adapters which improves the speed and ease at which even "large hand" technicians can access small form factor optical connectors. Higher capacity fiber connectivity solutions give service providers greater flexibility while also allowing telecom and data center providers to manage the explosive growth in the number of fiber connections more efficiently and more cost effectively. With PEACOC® technology, each individual optical connection can be easily isolated from adjacent ports creating a generous region of unobstructed handling space for safe, fast, and error free management of optical fiber jumpers. Go!Foton's 1RU PEACOC® patch panel is fully compatible with existing 19" racks and cable management solutions. This makes PEACOC® an ideal solution for operators looking to integrate high density connectivity solutions into their existing rack environment or into compact OSP cabinets for true "pay-as-you-grow" convenience and cost efficiency.

For maximum port capacity and density, PEACOC® may be deployed using Go!Foton's integrated Fiber Distribution Frame which will allow up to 4320 total ports.

The optical port density can be increased even further with the use of smaller form factor connectors or by integrating multi-fiber push-on (MPO) connectors. The Go!Foton PEACOC® technology platform addresses the biggest limitation associated with the use of high density fiber connectivity solutions today, namely, the difficulty in accessing and handling the compact optical connectors while performing typical moves, adds, & changes (MAC). Designed for use with either single mode or multimode LC connectors, the PEACOC® platform is also available for use with SC connectors. Other available options include preterminated cables assemblies and cassettes containing splice trays which can be used in conjunction with PLC's or xWDM's. Finally, the enhanced fiber management systems can easily handle 1.2mm to 3.0mm fiber optic jumpers.

PEACOC® High Density Fiber Patch Panel

Description

PEACOC® is Go!Foton's Platform with Enhance Access for Compact Optical Connectors. It is a revolutionary technology platform that transforms the way data center and telecom operators manage the increasingly complex world of optical connectivity. It is the only high density solution that provides easy access to both the front and back side connectors at the same time from the same side of the rack!

With PEACOC® spreadable adapter technology, each individual optical connection can be easily isolated from the adjacent ports creating a generous region of unobstructed handling for safe, fast and error free management of optical fiber jumpers. It's high density fiber management - **that works!**

PEACOC® fiber housings are available in 1RU, 2RU and 4RU sizes with densities up to 144, 288, and 576 fibers, respectively.

PEACOC® spreadable adapter technology enables easy connector access and fiber tracing in the highest fiber density environments. A craft friendly design even for large hand technicians.

PEACOC® trays not only allow access to the front and rear side of the connector at the same time, but they can be configured for all front access from the factory. The trays can be configured for patching, splicing, tapping, and can hold a number of PLC and WDM devices.

Fiber management arms and Go!Foton's SOC system provides a simple yet highly efficient way to organize the patch cords and fiber cable slack. The rear doors are uniquely designed to receive incoming cables at an angle to minimize bending.

PEACOC® housings are designed to adapt. The wall mount bracket is a space saving accessory used to flush mount equipment on the wall when there is no rack space and high fiber counts are needed.

Features

- Up to 144 LC connectors per 1RU
- PEACOC® spreadable adapter technology
- Supports SC, LC, MPO, and other small form factor connectors
- Modular cassettes configurable for patch, splice, PLC and xWDM applications
- Scalable in increments of 1RU, 2RU & 4RU
- 19"/23" rack mountable
- Wall mountable
- Pre-stubbed versions available
- Telcordia GR and TPR tested

Applications

- Data Centers, Central Offices, Headends
- Fiber Management and Distribution Frames
- OSP Cabinets and Wireless C-RAN Sites

PEACOC® Wall Mount Bracket

Description

The Go!Foton PEACOC® Wall Mount Bracket is a space saving accessory used to flush mount equipment on the wall when there is no rack space and large fiber counts are needed.

Features

- Mounts a fully loaded PEACOC Patch Panel
- Spring loaded detent in stowed position
- Occupies only 2.4" depth (1RU) or 3.7" depth (2RU) in the stored position
- Wall mounting template included

Benefits

- Use in confined space or when no rack space is available
- High Density: 144F in 1RU & 288F in 2RU
- Compatible with all PEACOC cassettes
- Universal Mounting: no rack, frame, or cabinet is needed

Applications

- Use in confined space or when no rack space is available
- High Density: 144F in 1RU & 288F in 2RU
- Compatible with all PEACOC cassettes
- Universal Mounting: no rack, frame, or cabinet is needed

Specifications

PEACOC® 1/3 RU Fiber Patch Panel

Description

The Go!Foton PEACOC® “1/3 RU” Patch Panel is an extremely thin version of patch panel for high-density fiber management applications where rack space is limited and only a few ports (up to 48 LC) are required. It's high density fiber management – **that works!**

Features

- High Density: 48 LC ports in 15mm rack space
- Easy Access: Employs PEACOC spreadable adapter technology
- Space Saving: Only needs 1/3 RU rack space
- Mounting: 19" rack, frame, or bay
- Compatibility: Accepts 1 or 2 standard PEACOC patch panel cassettes
- Accessibility: Access to both front & rear side connectors from the front of the panel

Applications

- 10G/100G Networks and beyond
- Telecommunication and Wireless Networks
- Data Center Networks
- Small Cell and C-RAN sites
- Telecom/Datacom rooms and closets
- Outdoor Cabinets, Vaults, and Huts

Specifications

P3TO – PEACOC V3 1/3 RU Short Panel, Empty Chassis
P3T5050R21X – PEACOC V3 (1/3 RU), 50mm Front and Rear Cable Sleeves, Rear Cable Routing, 2 Cassettes (fully loaded), LC/UPC Duplex Adapters

PEACOC® 3RU Splice Chassis

Description

The Go!Foton PEACOC® 3RU Splice Chassis is a high density rack-mount splice enclosure that securely stores & manages fiber splices for high density fiber distribution applications designed to accommodate up to 3 units of 144F fully loaded 1RU PEACOC® fiber patch panels with single fusion splices.

Features

- Up to 432 x F2 ports
- Configurable for Pad, Wall, and Post Mounting
- IP65 Grade Protection
- LC Simplex Adapters / CS adapters
- Patented Spreadable Adapters
- 24 Vertical Splitter slots
- Accommodates 1x4, 1x8, 1x16, 1x32
- Fully Accessible from the Front Side
- 1M Patch Cords - No Messy Fiber Routing

Specifications

PARAMETER	SPECIFICATION
Access Direction	Front
Panel Height	1RU & 2RU
Dimensions (stored position)	560mm x 390mm x 59mm (1RU) 560mm x 390mm x 94mm (2RU)
Total Weight	2.0 kgs (4.4 lbs)
Mounting Option	6mm anchor bolt (1RU) 8mm anchor bolt (2RU)
Mounting Width Flexibility	19" & 23" Standard

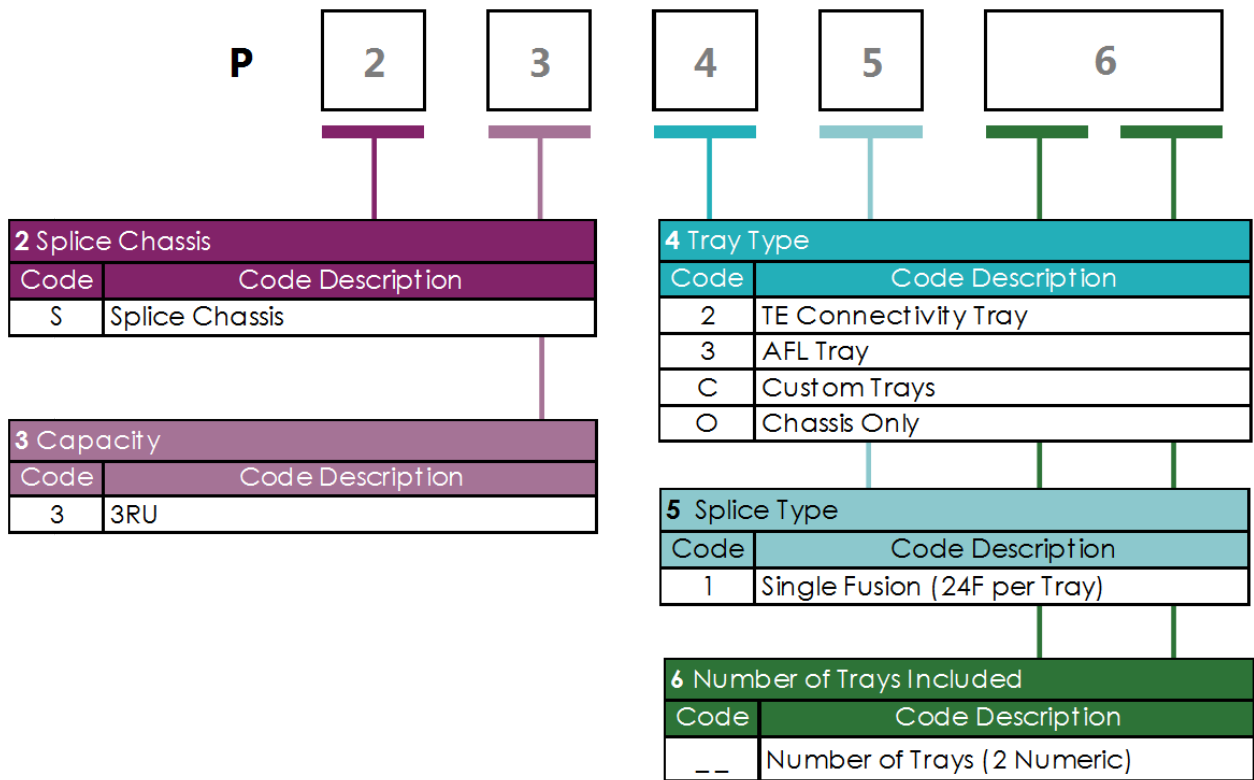

Applications

- Network/Telecom closets
- C-RAN site (COs, huts, vaults, etc.)
- Telecommunication Networks
- Data Communication Networks
- Optical System Access Networks
- Broadband / CATV Networks

PEACOC® FleT Preconfigured Cassettes

Dense Wavelength Division Multiplexer (DWDM) 100GHz Spacing, Multi-Channel in PEACOC® Flexible Tray

Description

The Go!Foton PEACOC® Ultra High Density Fiber Management Platform has been awarded US Patent #8,939,792 for its unique and innovative approach to fiber management. PEACOC® is a fully integrated and modular technology platform which forms the foundation on which small form factor jumpers and a multitude of optical components can be easily incorporated and managed in an ultra-high-density rack system. Now, with release of the newest PEACOC® V3.0 chassis, the same award winning PEACOC® technology is now available in modular form with the introduction of the value-added PEACOC® FleT – a Flexible Tray configuration which gives PEACOC® users the complete control to reconfigure the 1RU PEACOC® chassis in the field.

The PEACOC® FleT is a highly flexible, cassette-based design which may be ordered preconfigured or reconfigured in the field at any time, to support a variety of fiber patching and splicing applications. In addition, the FleT enhancement to PEACOC® allows users to field-install, manage and reconfigure integrated optical components such as tap splitters, PLC splitters and xWDM filter modules.

Go!Foton's DWDMs, are based on NSG's patent pending technology. This technology puts Go!Foton as one of only a few companies with a unique process for tuning the center wavelength in the DWDM spectrum. Based on NSG's unique SELFOC technology, the process eliminates the severe manufacturing burdens placed on the thin film filter, thus simplifying center wavelength tolerances and reducing cost. Go!Foton's SELMUX products are epoxy-free in the optical path and are in compliance with RoHS 6/6.

Features

- Patented accessibility; easy, fast and accurate
- Up to 24 simplex LC connectors per tray or 12 SC Simplex Connector
- Low Insertion Loss
- Low Polarization Dependent Loss
- Telcordia GR-1221 Compliant
- High Channel Isolation
- Flat and Wide Passband
- Exceptionally Stable and Reliable
- Epoxy-Free Optical Path
- RoHS 6/6 Compliant

Applications

- Dense WDM Systems
- Long Haul Networks
- Data Center
- Telecom Central Office
- CATV Headend + OSP Cabinets

PEACOC® FleT Preconfigured Cassettes

Planar Lightwave Splitter (PLC)

Description

Go!Foton's PLC Splitters provide high performance with very low insertion loss, excellent uniformity and temperature stability, and low PDL. They are designed for demanding requirements over a wide operating wavelength range and are GR-1209-CORE, GR-1221-CORE specification compliant. The splitters are made with Bend-Insensitive Single Mode fiber to achieve a robust, compact package that is durable for field handling. The splitters are available in multiple channel configurations with a variety of connector choices.

Features

- Telcordia GR-1221 compliant
- Patented accessibility; easy, fast and accurate
- Low Insertion Loss
- Up to 24 simplex LC connectors per tray or 12 SC Simplex connector
- Excellent Uniformity
- Low PDL
- Exceptionally stable and reliable

Applications

- B-PON / G-PON
- Fiber-to-the-Premise
- Fiber-to-the-Home
- Data Center
- Telecom Central Office
- CATV Headend
- OSP Cabinets

Optical Characteristics

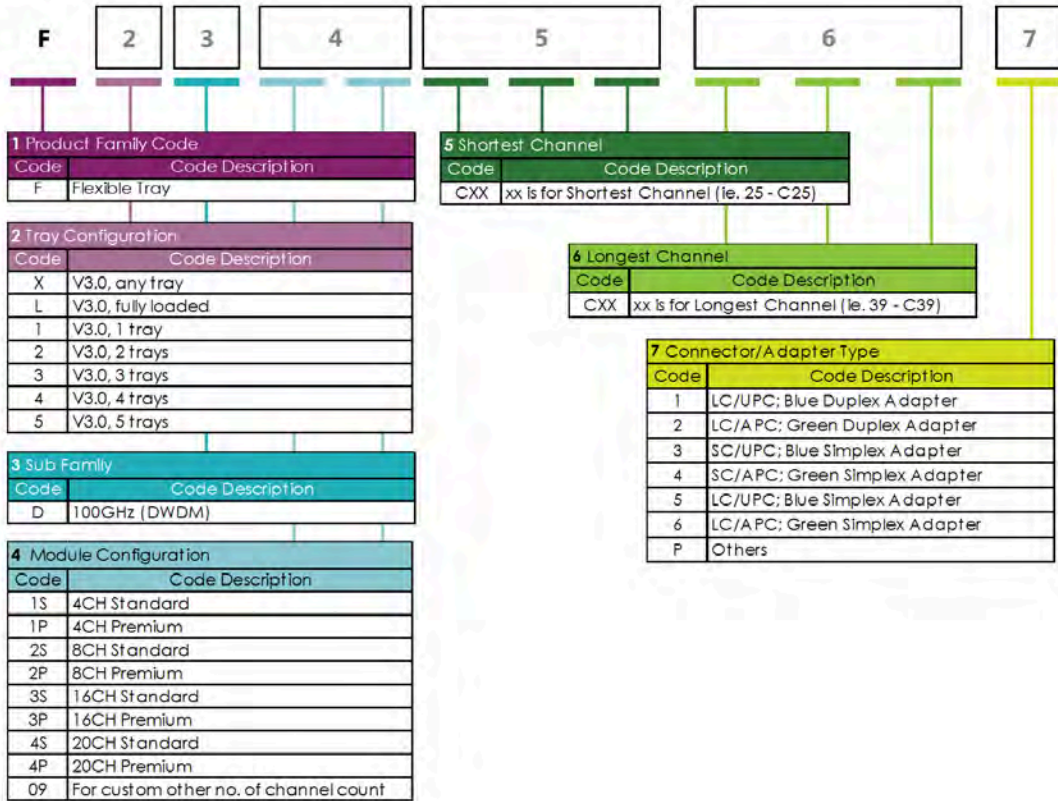

Parameter	Unit	1x2	1x4	1x8	1x12	1x16	1x24	1x32	1x64	
Operating Wavelength	nm	1260-620								
Insertion Loss	dB	≤3.9 ≤17.4	≤7.4	≤10.9	≤13.2	≤14.1	≤16.4	≤20.4		
Uniformity	dB	≤0.8 ≤1.4	≤1.0	≤1.0	≤1.0	≤1.0	≤1.4	≤1.7		
Polarization Dependent Loss	dB	≤0.2		≤0.3						
Wavelength Dependent Loss	dB					≤0.3				
Optical Return Loss	dB					≥50				
Directivity	dB					≥50				
Optical Power Handling	mW					≤ 300				
Operating Temperature Range	°C					-40-85				
Storage Temperature Range	°C					-40-85				
Fiber Type	-	ITU G657A2 Compliant Single Mode Fiber, Ribbon								

Notes:

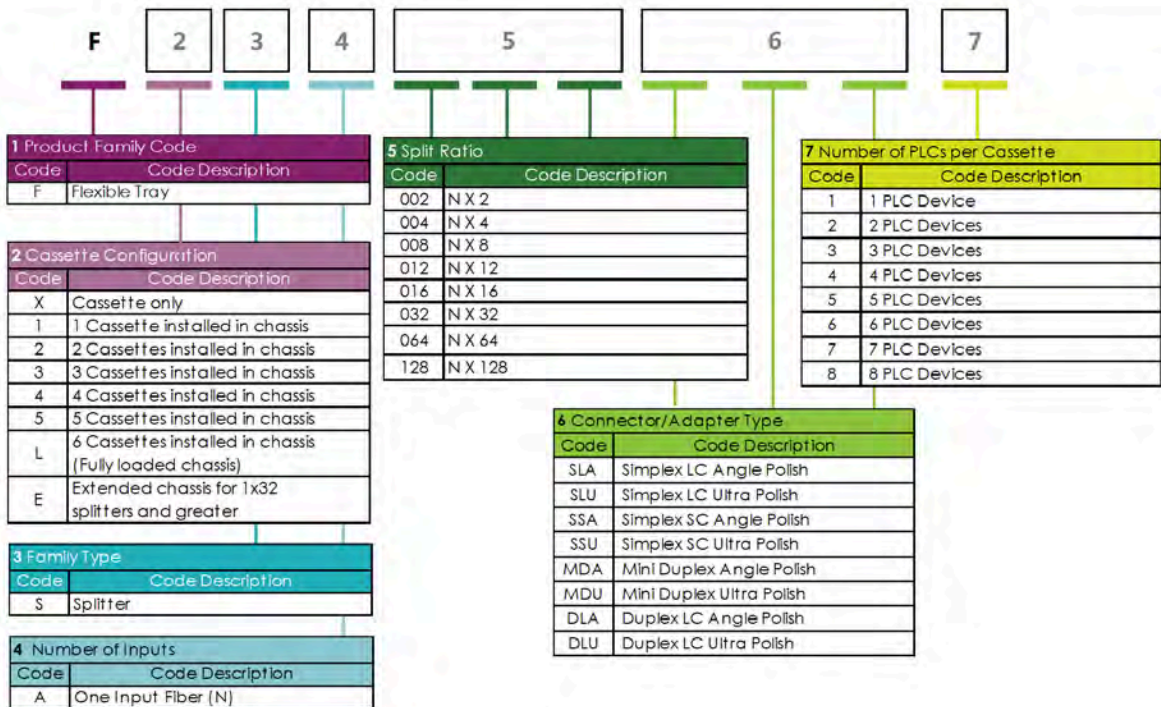

1. All specifications are with fiber connectors.
2. Uniformity is defined as loss difference between output ports (ie. between O1 and O2 for 1x2 splitter).
3. Custom configuration is also available (ie., 1x2 and 1x4 in one tray) per customer's request.

TFF Tap Monitoring in PEACOC® Flexible Tray (FleT)

Description

Go!Foton's Full band wavelength TFF Tap Monitors can be used to split light from one fiber to two fibers or to combine light from two fibers to one and provide high performance across a broad wavelength. These devices are ideal for CATV systems and telecommunications, and provide low insertion loss with high reliability.

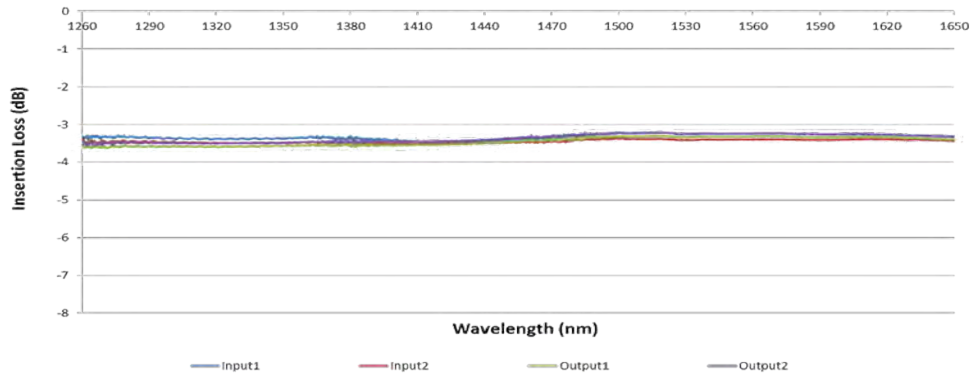

Features

- Patented accessibility; easy, fast and accurate
- Up to 24 simplex LC connectors or 12 SC Simplex Connectors and up to 72 ports for 12F MPO Connector per tray
- Low Insertion Loss
- Low Polarization Dependent Loss (Both Signal and Tap Ports)
- Telcordia GR-1221 Compliant
- Flat and Wide Passband
- Exceptionally Stable and Reliable
- Epoxy-Free Optical Path
- RoHS 6/6 Compliant

Applications

- Fiber Distribution
- Signal Monitoring
- Power Splitting
- Data Center
- Telecom Central Office

Wavelength Spectrum

Specifications

A. Optical Characteristics - Standard LC Tapping

Parameters	Unit	Specification		
Configuration	-	1x2 and 2x2

PEACOC® EVA (Enhanced View and Access) High Density Fiber Management Platform

Description

Fiber optic patch panels provide a centralized location for managing and connecting fiber optic cables and help streamline the network to ensure optimal performance and uptime. PEACOC® Enhanced View and Access (EVA) offers a variety of features and benefits to support the smooth and secure operation of your data center infrastructure. Whether you're installing a single panel or a full-scale deployment, EVA offers a flexible and effective solution. Network scalability at-the-ready.

Introducing the PEACOC® EVA platform. Finally, you don't have to invest in a completely new system every time you need to scale up. High reliability adapters offer improved performance and fewer data loss incidents. The unique design with adapter isolation further ensures a solution that can meet the current and future needs of your data center. PEACOC® EVA solution not only saves on deployment cost and time, but also provide the assurance that your network investment will last for years.

Features

- PEACOC® spreadable adapter technology
- Easily identifiable ports marked on the bottom as well as the top
- Cassette based design supports patching, splicing, and integrated optical components such as Tap splitters, PLC splitters, and xWDM modules.
- LC, SC, MPO, and other adapter types.
- 1RU density up to 72 Duplex LC ports (144F)
- Mounts in any 19" or 23" rack, frame, or cabinet.

Port Numbering on bottom of duplex LC adapter

PEACOC® 360 PANEL

Description

The PEACOC® 360 panel takes speedy network deployments to the next level with usability, manageability, density, and distance. This fast-deployment fiber optic connectivity solution is perfect for most central office, LAN, and data center applications where direct connect or tie panel architectures are needed.

This innovative solution features four independent spools, each with 100 ft of 24F, 3.0 mm cable. The spool capacity not only maximizes the reach distance, but also provides the most flexibility for slack management, virtually eliminating the need for pre-measuring cable lengths.

The modular 1RU panel holds up to 96 duplex LC connections. These may be added after first installation, providing ultimate day-two flexibility. The Go!Foton PEACOC® 360 is the right-sized quick-deployment connectivity solution for facilities where resources, scalability, and density need to be optimized.

Benefits

- Ease and speed deployment, moves, and redeployments
- Reduce labor time/costs
- Simplify inventory management, no need for custom cable assemblies or waiting on lengthy lead times
- Optimize network architecture with the ability to scale quickly
- Flexible design allows for configurations after initial installation

Features

- Four independent cable spools optimized to hold the maximum amount of cable
- PEACOC spreadable adapter technology for generous access to all connectors without affecting insertion loss or risk of an accidental disconnect
- Fixed fiber connections isolated from the spool preserves connection integrity
- Magnetically secured doors to protect connections
- Integrated cable and slack management
- Designed to fit in any 19 in. or 23 in. rack

Applications

- Central Office
- Head-ends
- Data Center
- Enterprise

PEACOC® NEMO Patch Panel

Description

The NEMO “Any Density” Fiber Patch Panel is the latest advancement in the PEACOC® product family that integrates GoFoton’s innovative spreadable adapter technology into a traditional bulkhead-style fiber panel. The result is a simple and low-cost solution that enables superior access and secure fiber management for any number or type of connection. It is ideal for today’s modern high- capacity and data-rate intensive telecommunication and data communication networks. Network Enhanced Manageable Optics: It’s “any density” fiber management – **that works!**

Benefits

- Easy Access: NEMO spreadable adapter technology that minimizes insertion loss while providing generous access to all connectors
- Scalable Density: From 6 ports (single rail) to 72 ports (fully loaded) and anything in-between
- Versatile: Supports a variety of connector types from LC to SC to MPO and more
- Universal: Mounts in any 19” or 23” rack, frame, cabinet, or wall mount bracket
- Flexible: Supports basic patch panel functionality and pre-terminated cabled panels
- Cost Effective: Simple, lightweight design

Features

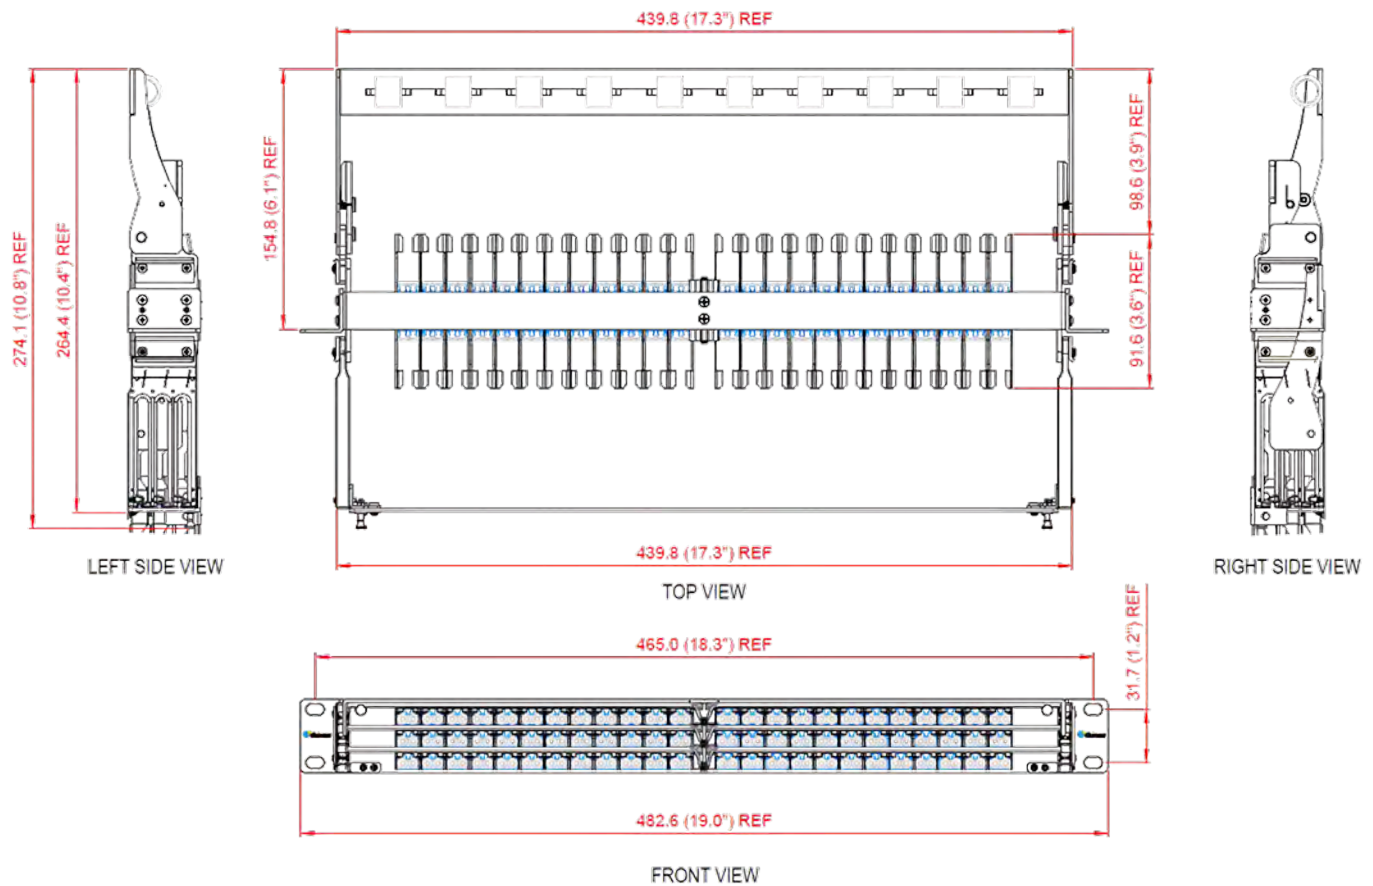

- Adapters safely and effortlessly spread apart using NEMO technology
- Field expandable – can mix and match connector types as you grow
- Convenient port labeling for each connection on both front and rear sides of the panel
- Optional front and rear protective doors with ample space for circuit identification
- Available with a variety of options for cable management on the front and rear sides

Applications

- Datacenter Networks
- Enterprise Networks
- Telecommunication Networks
- Wireless Networks
- Fiber Management and Distribution Frames
- Outdoor Cabinets & Enclosures

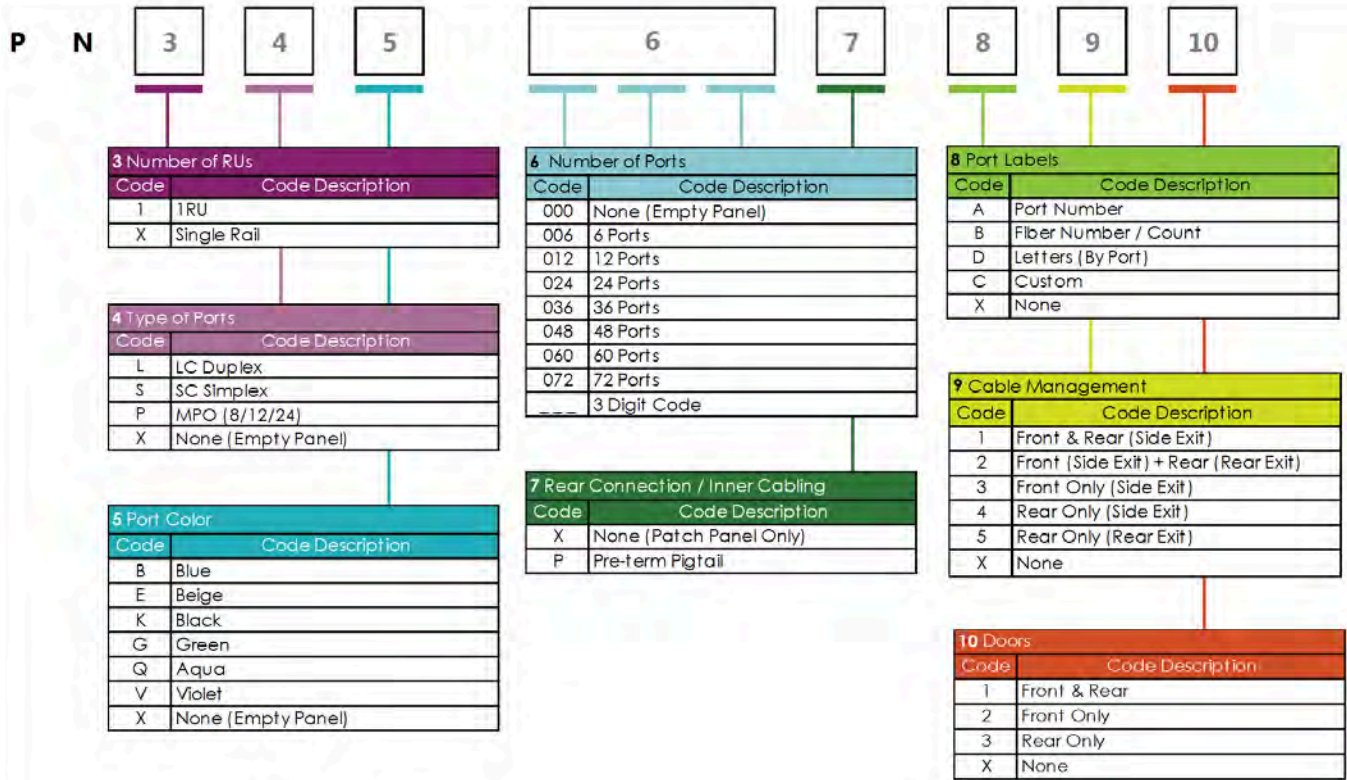

Product Dimensions

Specifications

Max Number of Ports Per 1RU	Duplex LC: 72 Ports (144 fibers) Simplex SC: 72 Ports (72 fibers) MPO: 72 Ports (72 x 8, 12, or 24 fibers)
Height	1RU (~1.75")
Weight	19" Rack (std) 23" Rack (with available adapter brackets)
Depth	10.8" (with both front & rear cable managers)
Total Weight (full port capacity)	2.3lbs (1.04kg)
Operating Temperature	-40 °C to +65 °C
Cable Type(s)	1.2mm, 1.6mm, 2mm, 3mm, 3.8mm, etc.
Standards	GR-449

Ordering Guide

PEACOC® Fiber Distribution Frame (FDF)

Description

The Go!Foton PEACOC® Fiber Distribution Frame is a 7ft. open frame used to safely mount fiber optic panels/enclosures, and was designed to accurately store and manage large volume of cables in a high density configuration. For maximum port capacity and density, PEACOC® panels/enclosures may be deployed using PEACOC® Fiber Distribution Frame which will allow up to 5760 LC Ports. The optical port density can be increased even further with the use of smaller form factor connectors, or by integrating multi fiber push-on (MPO) connectors.

Features

- 40U
- 19"/23"
- Bonding and grounding ready
- Rear & Front troughs are available for crossing cables from left to right side of the frame or vice versa.

Applications

- Telecommunication Networks
- Data Communication Network
- Optical System Access Networks
- Broadband / CATV Networks

Specifications

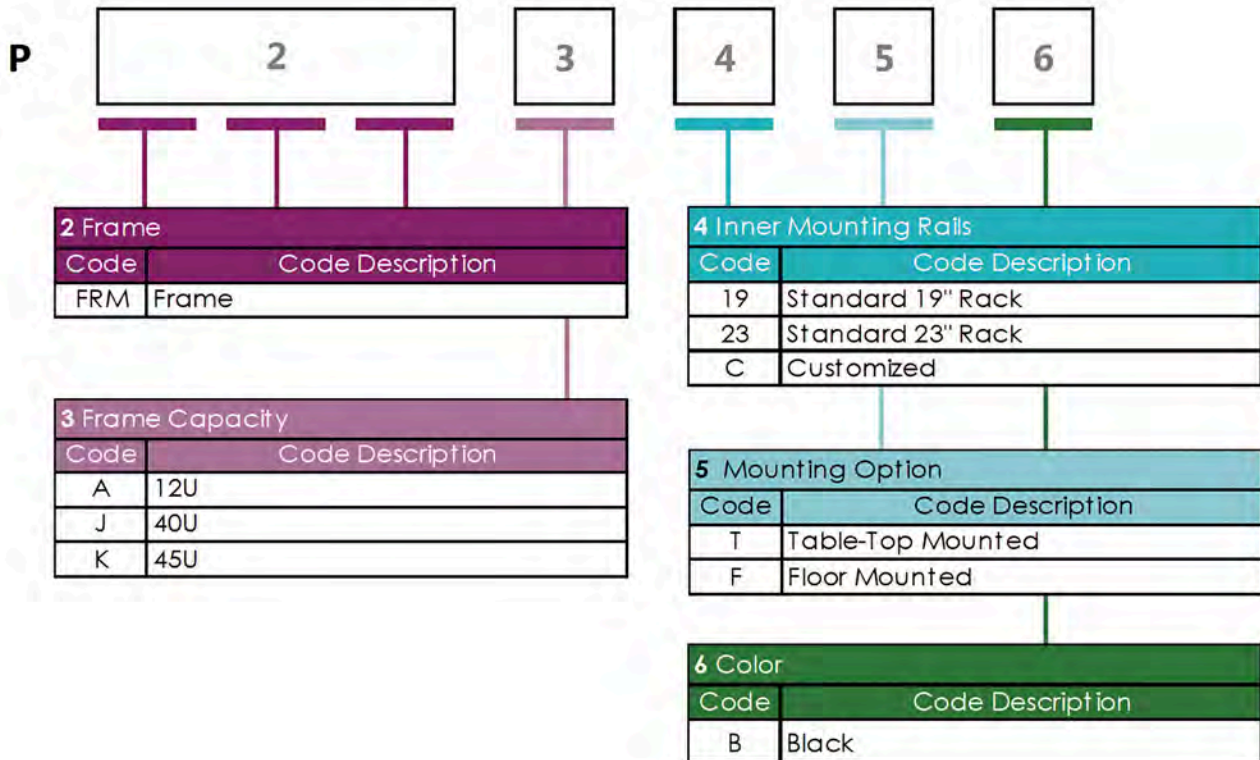

Dimensions	30"L x 23"W x 84"H
Total rack unit capacity	40U
Rack Mounting	19"/23"

PEACOC® Connector Label Clip

Description

The Go!Foton PEACOC® Connector Label Clip is a light-weight accessory that provides cable labeling for high density connector applications like cassettes and patch panels. The clips have a built-in locking mechanism that can be attached to standard boot sizes. PEACOC® Connector Label Clips come in attached pairs which can be fastened on duplex connectors or can be easily be separated for simplex connectors.

Features

- Ideal for high density applications
- Detachable and interchangeable clips
- Accommodates both handwritten and sticker labels
- Flexible for many standard boot sizes
- Built-in locking mechanism
- Separable for simplex connectors

Applications

- LC Duplex/Simplex Connectors
- SC Simplex Connectors

PEACOC® Storage Organizer for Cables (SOC)

Description

The Go!Foton PEACOC® SOC is a light weight and highly durable woven sleeve designed to enhance the organization of optical fiber patch cables in high density fiber management systems such as ODFs, fiber distribution hubs & terminals, or any other application where long length jumpers are typically used in large bundles. The PEACOC® SOC is available diameters ranging from 3/16-inch through 3/8-inch making it suitable for a wide variety of cable management challenges. The PEACOC® SOC is supplied in fixed lengths with a factory terminated end that is easily attached using a standard tie wrap. Each SOC may be cut to the precise length required in the field before adding the zipper clips.

The Zipper clips are easily attached to the sleeve creating a simple and highly efficient way to organize patch cords. The PEACOC® SOC does not require any special tools to install or operate and it can be used over and over again whenever access to the patch cords is required. The PEACOC® SOC is highly effective in organizing large bundles of small form factor patch cords such as 1.2mm or 1.6mm LC jumpers.

Features

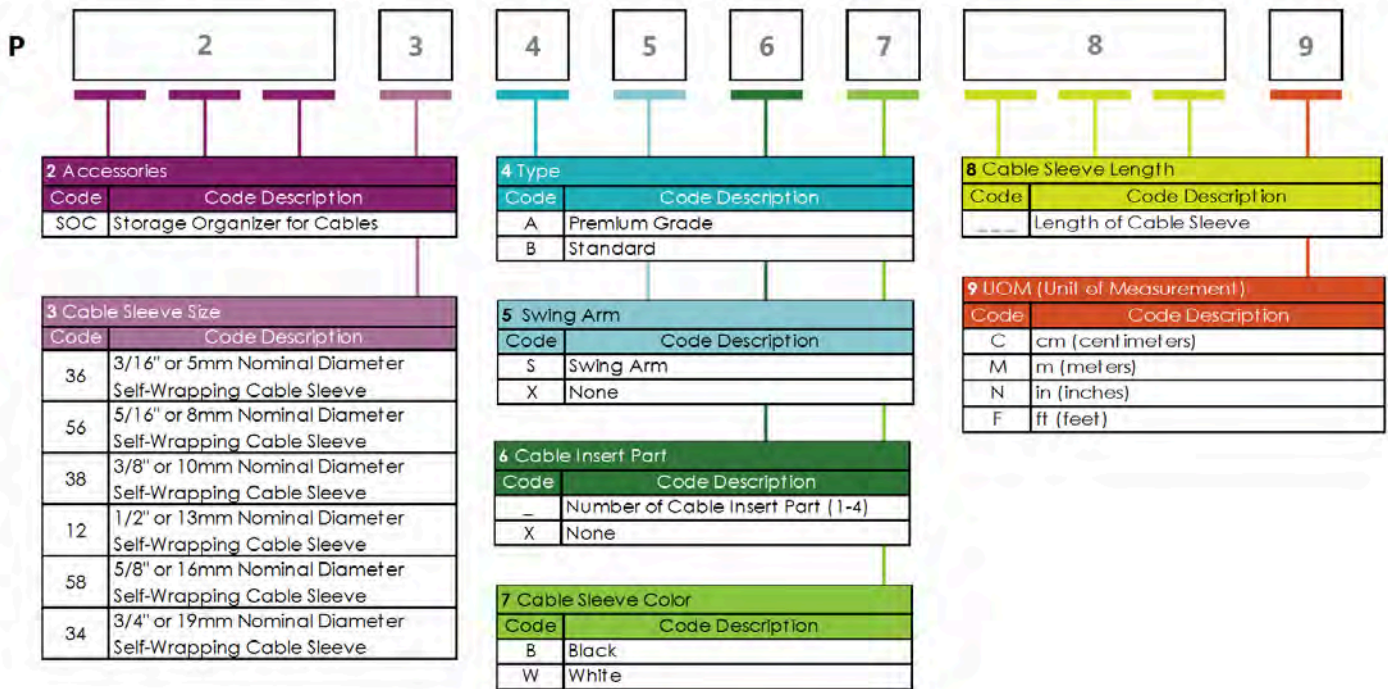

- Organize & manage large bundles of jumpers
- Lightweight, durable, and flexible sleeve
- Easy and fast installation
- Easy attachment to any rack system, ODF, or enclosure
- Simple access to add or remove individual jumpers
- Suitable for small size 1.2mm LC
- Compatible with all cable products
- Provides added mechanical protection
- Rated UL-94, V0

Applications

- Organization & Protection of Patchcords
- Suitable for High-Density Fiber Management
- Data center, Telecom CO, CATV Headend
- Remote Terminals, Enclosures and Cabinets

Ordering Guide for Cable Sleeve

Go!Foton's OSP Product Portfolio

In today's modern outside plant (OSP) fiber networks, the key elements for Service Providers to quickly and easily deploy reliable and economical fiber networks in any type of environment are product size and ease of installation.

Go!Foton's OSP product platform is uniquely designed to offer both – small terminals that are simple to deploy and use standard connector types that are readily available and familiar to engineers, installers and technicians. These hardened and versatile fiber terminals, closures, and drop cables take nothing proprietary or complicated to install and are ideal solutions for all types of OSP fiber deployments including FTTH, FTTA, FTTB, and HFC networks.

Go!Foton's OSP terminals and closures employ PEACOC® spreadable adapter technology to densify the number of fibers per terminal, while providing manageable craft access to the connectors – even for technicians with the largest hands! In addition, by integrating standard SC, LC, and MPO connectors, the installer is instantly at ease with knowing how to make connections without having to use proprietary hardened connectors and cables. Go!Foton's true vertical integration also provides for a vast array of application diversity by incorporating our own Telcordia certified xWDMs, Splitters, and TAPs into each terminal type to support the variety of fiber network topologies.

Go!Foton's OSP Product Portfolio

Go!Foton's products range from fully hardened GR-771/IP68 terminals like our unique Clamshell Hardened Terminal (CHT) and Mid-span Clamshell Hardened Terminal (M-CHT) that are compact and use standard connector drop cables for a craft friendly, fully hardened connection. Terminals with integrated PEACOC® spreadable adapter technology are compact, easy to access, and provide high-density solutions for both OSP and in-building fiber distribution.

The PEACOC®-enabled Compact OSP Terminal and Small MDU Terminal can also be equipped with Splitters and xWDMs for even greater versatility. For rural deployments and distributed FTTx architectures, Go!Foton's OSP Splice, Splitter and Engineered TAP terminals provide a compact and cost-effective design that supports a variety of feeder, branch, and drop cable types and can be quickly deployed in both urban and less-dense communities.

The new Multiport Mid-Span Terminal (MMT) integrates our PEACOC® spreadable adapters into a high capacity, fully functional below and above grade terminal for FTTx network everywhere. It's high-density fiber management for the outside plant – *that works!*

PEACOC® Multiport Mid-Span Terminal (MMT)

Description

The PEACOC® Multiport Mid-Span Terminal is a flexible fiber optic connectivity solution that can be deployed in either above or below grade applications to suit a variety of outside plant network needs. It offers a wide range of configurations for a variety of functions with guaranteed quality and water-tight performance: from mid-span splicing, to optical component integration, as well as pre-connectorized customer drop applications. The PEACOC® MMT family of OSP terminals is ideal for any telecommunications, FTTx, or wireless fiber networks. It's flexible, reliable, high density fiber management – that works!

Benefits

- Faster and more accurate installations with easy connector access using PEACOC® spreadable adapter technology
- Provides flexibility with one form factor for a variety of applications (splice, splitters, TAPs, and WDMs)
- Reduces lead times while diversifying the supply chain by using standard connector fiber drop cables
- Simplifies inventory management

Features

- Large capacity in a compact size
- Isolated user access between feeder/branch splice and drop cable/splice areas
- Splitter/TAP/WDM module tray is field replaceable
- Eight cable entry/exit ports for feeder and branch cables
- Up to 16 drop ports for flat or round cables
- Butt-splice and In-Line splice capable
- Holds up to 8' of cable/buffer tube slack for a 288F cable
- Pole, strand, wall, pedestal, handhole/manhole mountable
- Compliant with GR-771 and IEC 60529 (IP68)

Applications

- FTTx networks where mid-span splicing is required for new customer adds
- FTTx networks with distributed split architectures
- Rural FTTx deployments where subscriber density is significantly lower than in urban areas
- FTTx pathways that have individual or small clusters of subscribers spread out over long distances

PEACOC® 4-PORT MID-SPAN MULTIPOINT TERMINAL

Description

The PEACOC® 4-Port Multipoint Mid-Span Terminal (MMT) is a compact outside plant fiber terminal designed to pack in density and be easy to install. The FTTx terminal is right-sized for operators building distributed split architectures, where mid-span splicing is required to add new customers, or for FTTx connections spanning long distances between sparsely populated areas.

Because one size does not fit all, this terminal offers 4 drops with an additional plug-and-play port for maximum flexibility. Its modular tray accommodates splitters, engineered TAPs or splice up to 24 fibers. And the compact, water-tight design and universal mounting features make this solution perfect for both above and below-grade installations. With its size, trademark PEACOC spreadable adapters, and customizable features, the 4-Port MMT makes installations and service fast and straightforward.

Benefits

- Improve inventory management with modular design
- Save technician resources & reduce downtime
- Faster & more accurate installations with easy fiber access
- Simplify sourcing with standard drop cable and FIC compatibility
- Install almost anywhere with water-tight, universal mounting capability

Applications

- FTTx networks where mid-span splicing is required
- FTTx networks with distributed split architectures
- FTTx pathways that have subscribers spread out over long distances

Features

- Compact size for 4 drops with additional port for plug-and-play input
- Supports standard field-installable connectors on drop cables
- Isolated user access between feeder/branch splice and drop cable/splice areas
- Two cable entry/exit ports for feeder cables and one port for branch cable
- Universal mounting bracket for pole, strand, wall, pedestal, and handhole/manhole installation
- Meets IEC 60529 (IP68) standards for above and below-grade applications

Specifications

Attributes	Specifications

PEACOC® Clamshell Hardened Terminal (CHT)

Description

Go!Foton's innovative CHT offers hardened fiber terminal functionality using standard fiber drop cables and connectors no hardened connectors required! The clamshell terminal design provides IP68 protection for each individual fiber connection while providing fast, easy, and secure access to deploy fiber networks quickly and proficiently. CHT offers a compact design to fit into small spaces for any OSP or ISP environment and is available in 4 port and 8 port versions with a variety of mounting options and cable stub lengths for applications in FTTx, Wireless, and other fiber networks. It's reliable high density, hardened connectivity - that works!

Applications

- Telecommunications & Data Communications networks
- Ideal for 5G, Small Cell, Rural, and DAS Networks
- FTTH, FTTA and MDUs
- External or Concealed within Pole Mounting

Features

- Hardened connectivity using standard LC, SC, and MPO fiber connectors
- Compatible with any standard universal drop cable
- Isolated individual connector ports, each in a dedicated IP68 chamber with reliable clasp latching
- Compact 4-Port and 8-Port configurations
- 1X4 and 1X8 splitter versions for distributed split architectures
- Pole, Wall, Pedestal, Manhole, Handhole and Strand mountable
- Compliant with GR-771 and IEC 60529 (IP68)

Benefits

- Reduces the need for splicing in the OSP environment
- Eliminates dependence on hardened connectors
- Shortens lead-times with standard universal drop cables and connectors
- Diversifies supply chain using standard fiber cables
- Simplifies inventory management
- Deploys in a broad applications space across any OSP, 5G and FTTx network

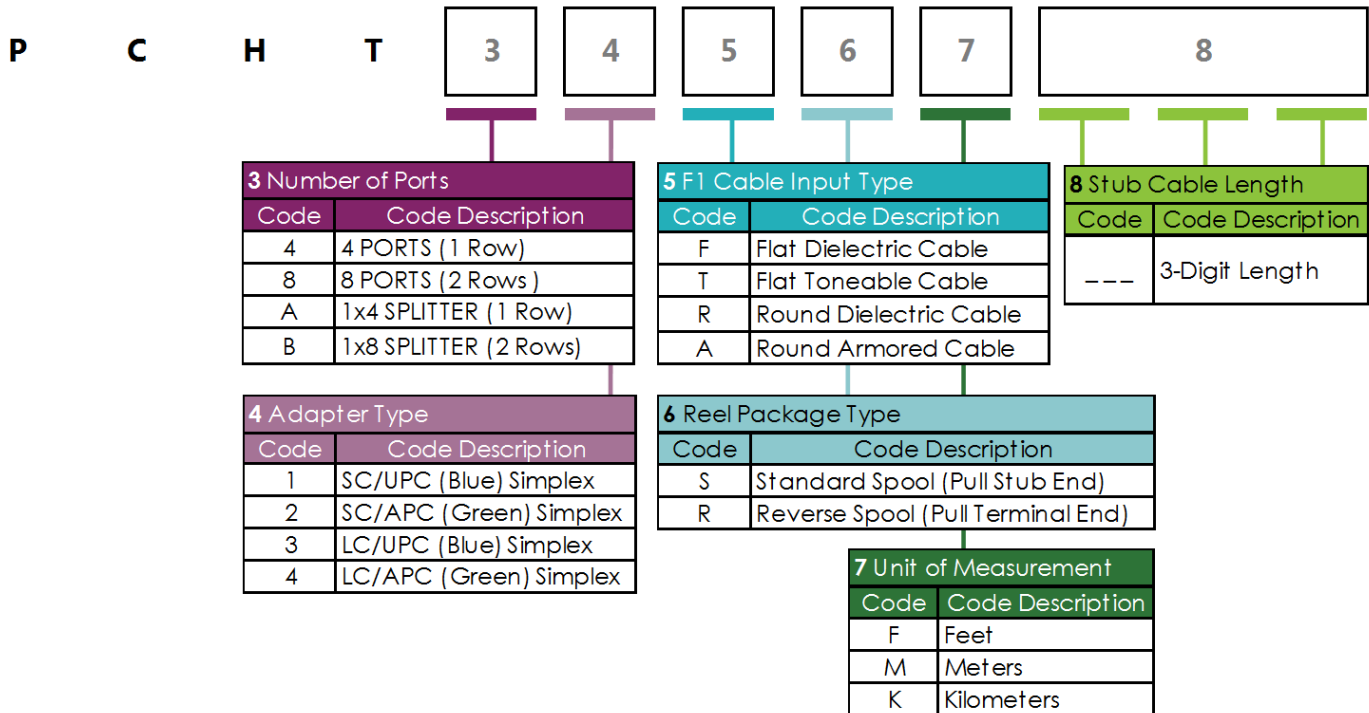

Specifications

Parameter	Specification
Fiber Capacity (drops)	4 Ports (1 row) 8 Ports (2 row)

PEACOC® Mid-Span Clamshell Hardened Terminal (M-CHT)

Description

The flexible PEACOC® M-CHT offers simple splice-in with plug-and-play hardened fiber connectivity using standard fiber drops in a compact yet versatile design without requiring proprietary/hardened connectors. It is ideal for fast fiber installation and quick turn-up of field connections in an extremely small terminal with guaranteed quality and performance. Available with four feeder/branch ports, four or eight drop ports, passive optical component integration, and single or mass fusion splicing, this unit is ideal for telecommunication, FTTx, or wireless fiber network. It's reliable high-density, hardened connectivity - **that works!**

Features

- Hardened connectivity using standard LC & SC connectors
- Compact design - very small in size
- Isolated individual IP68 connector ports
- Reliable and rugged clasp latching
- Separate sealed compartment for feeder cable
- Four cable entry/exit ports for feeder & branch cables
- Both single fiber and mass-fusion splice options
- Suitable for housing Splitters, Engineered TAPs, & WDMs
- Holds up to 7 feet of cable/buffer slack for a 144F cable
- Pole, Wall, Pedestal, Manhole, and Strand mountable
- Compliant with GR-771 and IEC 60529 (IP68)

Applications

- Telecommunications & Data Communications networks
- Ideal for 5G, Small Cell, Rural, and DAS Networks
- FTTH, FTTA and MDUs

Clamshell Hardened Terminal Drop Cables

Description

Go!Foton's drop cables are designed to complement Go!Foton's Clamshell Hardened Terminal (CHT) for connecting the CHT and M-CHT to the subscriber network interface. These drop cables use standard connectors – no hardened connectors required! The durable round I/O and flat OSP cables clamp directly to the hardened terminal providing reliability and performance. The Go!Foton Clamshell Hardened Terminal Drop Cables are designed and tested to exceed industry standards. We provide experience, technical application support, competitive pricing, and On Time delivery.

Benefits

- Factory terminated standard connector solution to reduce installation time
- Field Installable connector kits available for field termination or restoration if needed.
- Installed directly to Clamshell Hardened Terminal without using hardened connectors
- Deploys in a broad applications space across any OSP, 5G and FTTx networks

Features

- Round 3.0mm & 4.8mm ruggedized indoor/outdoor drop cables utilize bend insensitive fibers
- Factory terminated micro flat dielectric 5.4mm x 3.0mm & micro flat toneable 7.6mm x 3.0mm drop cables
- Offers 8.1mm x 4.6mm flat dielectric and 10.1mm x 4.6mm toneable flat drop cable transitioned to 4.8mm round cable for direct installation to similar terminals on the market

Applications

- Telecommunications & Data Communications Networks
- Ideal for 5G Small Cells, Rural and DAS Networks
- FTTH, FTTA, and MDUs
- CATV Video Systems and Optical LAN Networks

PEACOC® Compact OSP Terminal 12/24/32/48 Ports

Description

The GoFoton PEACOC® Terminal offers high density fiber management in an extremely small yet easily accessible box for fast installation and quick turn-up of field connections with guaranteed quality and performance. Offered with a variety of stubbed outside plant (OSP) cable lengths, this fiber terminal provides versatility for a variety of fiber network applications. Non-stubbed versions deliver simple plug-and-play operability using high quality fiber terminations. A variety of mounting options are also available to provide value and consistency throughout the network. It's high-density fiber management – **that works!**

Features

- Enhanced connector access using PEACOC® spreadable adapter technology
- Pre-terminated solution reduces cable installation costs
- Compact size for concealed applications and tight spaces
- Removable / tethered cover for ease of use
- Pre-stubbed terminal integrated with rotatable spool packaging for simple installation
- Strand, Pole and Wall mounting versatility

Applications

- Telecommunication and Wireless Networks
- Ideal for 5G, Small Cell, and DAS Networks
- Demarcation terminal between Core Network and Wireless or Access Edge
- FTTA and MDU applications
- 10G /100G networks and beyond
- Strand Mount, Pole Mount and Wall Mount options

Ordering Guide

Parameter	Specification
Outer Dimensions	8" x 13" x 3"
Fiber Capacity (input/drops)	12 ~ 48 Fibers
Number of Adapters	12 ~ 48 Simplex / 6 ~ 24 Duplex
Adapter Type(s)	Duplex/Simplex LC APC, LC UPC, SC APC, SC UPC
Pre-Stubbed Lengths	50-500 feet
Optional Non-Stubbed	Also available with non stubbed: LC Terminated, MPO Terminated or Bare Cable for Splicing
Operating Temperature	-40 °C to +70 °C
Mounting Options	Strand, Pole, and Wall Mount
Locking Mechanism	216 tool key
Cover	Hinged with Tether (Field Removable)
Color	Gray
Packaging	Rotating Spool in a Carton: < 500 ft stub Standard Carton for Non Stubbed
Standards	VZ TPR.912 and GR-771

PEACOC® Small Fiber Terminal

Description

The Go!Foton PEACOC® Small Indoor Fiber Terminal offers high-density fiber management in an extremely small yet easily accessible enclosure for fast installation, easy access, and quick turn-up of field connections with quality and performance. This terminal delivers simple plug-and-play operability for use in any fiber network application –ideal for customer premise and MDUs. It's high-density fiber management – **that works!**

Features

- Enhanced connector access using PEACOC® spreadable adapter technology
- Extremely small & compact size
- Up to 24 LC drop ports (simplex or duplex) or 12 SC drop ports (simplex)
- Pre-stubbed or Non-stubbed options available
- Field installable feeder cable: splice or connectorized
- Integrated optical components: PLC Splitters, DWDMs and Engineered TAPs

Applications

- Suitable for use in any fiber network
- Ideal for 5G, Small Cell, and DAS Networks
- FTTA and MDU applications
- HFC networks
- 10G/100G networks and beyond

PEACOC® Small Terminal 360

Description

The PEACOC® Small Terminal 360 (ST360) offers high density fiber management in an extremely small, yet easily accessible enclosure for quick turn-up of field connections. PEACOC spreadable adapter technology provides ample handling space for safe, fast, and error-free installation of drop cables. The internal, rotating cable spool holds up to 120 feet of stub cable for quick deployment or convenient slack storage. For plug-and-play operability and reduced labor costs, the cable stub can be factory terminated with an MPO connector. The PEACOC® ST360 helps fiber networks work smarter, not harder, saving time and money.

Benefits

- Improves turn-up accuracy due to easy fiber access without disruption of other fibers
- Speeds installation and reduces labor costs with MPO plug-and-play connections
- Saves space with small footprint and built-in slack storage capabilities

Features

- High capacity in a compact size (up to 12 SC or 24 LC drop ports)
- PEACOC spreadable adapter technology for enhanced connector access
- Pre-stubbed tail lengths up to 1,000 ft with an option for MPO termination
- Internal spool deploys/stores up to 120 ft of 3.0mm fiber cable
- IP63 rated for indoor installation

Applications

- Suitable for use in any fiber network
- FTTA, MDU, and customer premise applications

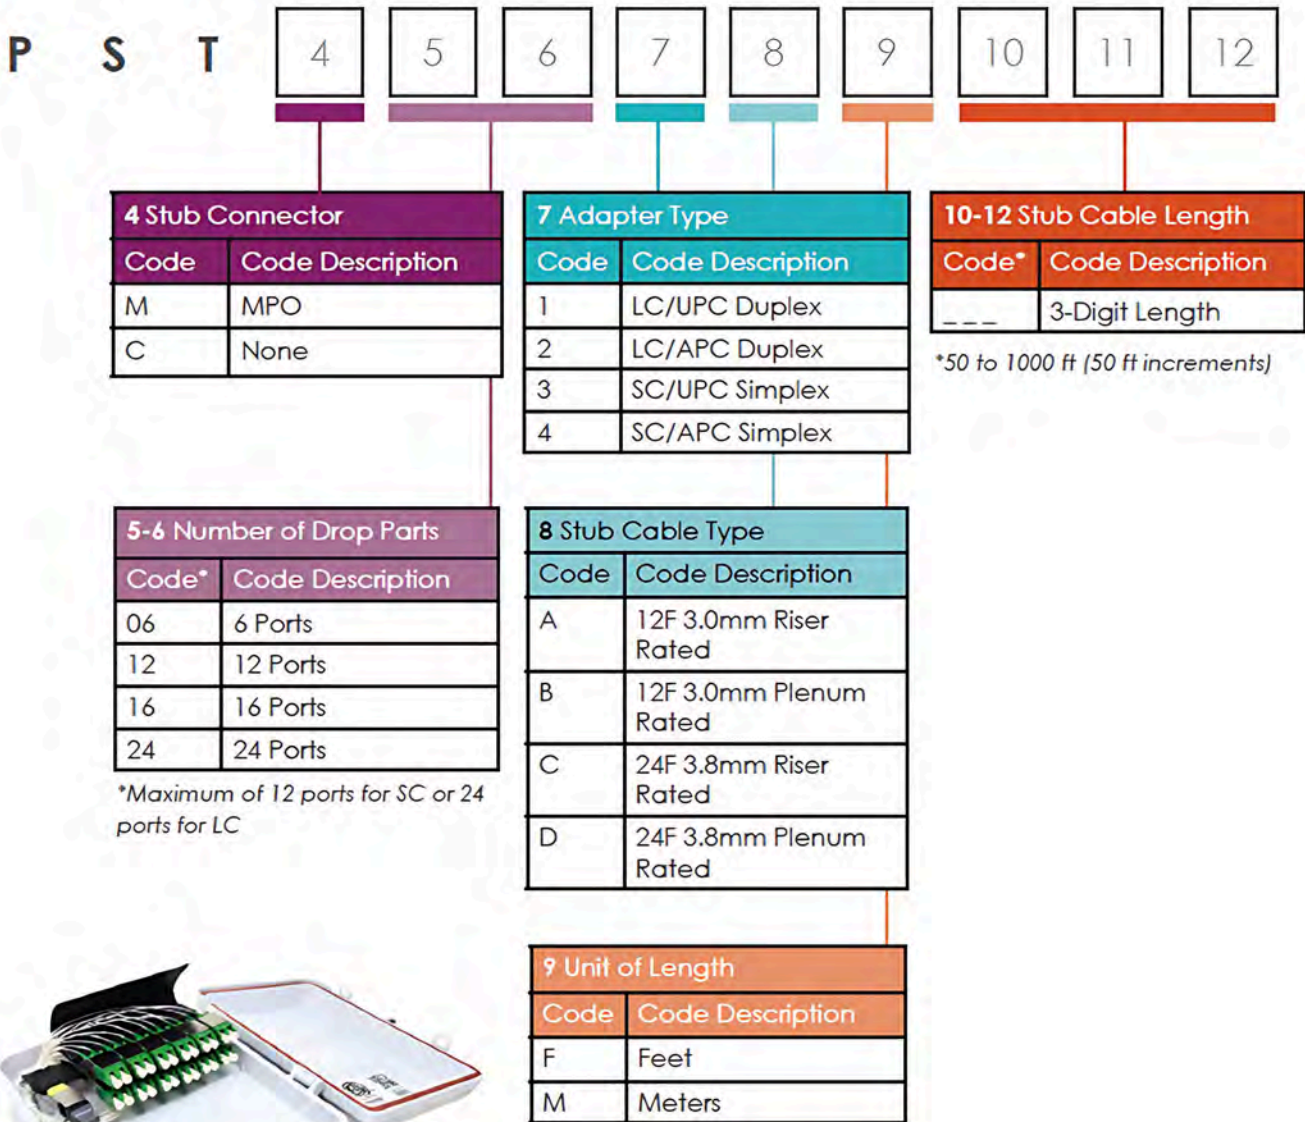

Specifications

Attributes	Specifications
Drop Port Capacity	Up to 12 SC / 24 LC
Supported drop cables	3.0mm Round
Adapter Type(s)	LC/APC & LC/UPC Duplex, SC/APC & SC/UPC Simplex
Internal Cable Spool Capacity	Up to 120 ft of 3.0mm cable or 75 ft of 3.8mm cable
Locking Mechanism	Standard Phillips Head Screw
Color	White
Operating Temperature	-40°C to +65°C
Mounting Options	Wall Mount
Standards	IP63, ETL

Connect or Repair Enclosure (CORE) Kit

Description

The Go!Foton Connect or Repair Enclosure Kit (CORE Kit) offers a versatile and simple solution for deploying single fiber drops, repairing damaged cables, and extending cable runs. Its compact design suits a wide range of applications. This all-in-one kit enables customers to assemble components on-site featuring interchangeable grommets and a splice/adaptor tray, it provides unmatched flexibility and adapts effortlessly to various cable types and needs.

Certified to GR-771/IP68 standards, the CORE Kit excels in tough conditions, whether installed below grade, buried, or aerially. Its rugged construction ensures reliability and durability. Ideal for low fiber count applications, its compact size reduces storage and transportation costs while maximizing convenience.

Benefits

- Modular design with interchangeable grommets and splice/adaptor tray allow for versatility in cable types and applications
- Compact size and cost-effectiveness ideal for low fiber count applications
- Built to withstand outside plant environments in below grade, buried, and aerial installations with GR-771/IP68 Certifications

Features

- Compact size and cost-effectiveness
- Modular design with interchangeable grommets and splice/adaptor tray
- Dual latches & rugged exterior
- GR-771 & IEC 60529 (IP68) rated

Applications

- FTTx networks where single drop connections are deployed near customer premise
- Repair damaged or cut cable in the field
- Extension of cable runs

Specifications

Attributes	Specifications
Cable Entry/Exit Ports	1 in / 1 out

Fiber!Fast™ Indoor Living Unit (ILU) Solutions

Description

Go!Foton's solution for FTTH development in existing multi-dwelling unit (MDU) buildings. FiberFast™ is simple and quick solution to install FTTH services in existing living units. Fiber!Fast™ does not require drilling or the use of mechanical fasteners, staples, or conduits.

Fiber!Fast™ is a very small form factor, micro-cable consisting of durable, 900um transparent drop cable containing ultra bend-insensitive optical fiber (ITU-T G.657.B3). Fiber!Fast™ is attached to the wall using micro-clips, which are affixed to the wall using adhesive backing. Fiber!Fast™ micro-clips secure the micro-cable to the wall surface, and limit bending that may degrade performance.

Features

- Easy & Fast Installation by one Technician
- No drilling or mechanical fasteners required
- Highly durable, yet easily removed when needed
- Reliable, Ultra Bend-Insensitive Fiber
- Virtually Invisible Installation
- Clips are tested by Telecordia GR-1221-CORE and VZ-TPR-9459 to meet the highest Performance

Applications

- Indoor, Micro-Cable Pathway
- Bring FTTH to existing living units
- Supports Fiber-to-the-Desktop
- Can also be used for schools, hotels, hospitals, or small businesses.

Pathway Creation Toolkit

Translucent Optical Micro-Cable

- 900um, Tight Buffered Micro-Cable
- Ultra Bend-Insensitive Fiber (ITU-T G.657.B3)
- Resilient Buffer Material
- Highly Durable, Engineered Plastic Sheath
- Nearly Invisible Appearance
- Paintable if Desired
- Flame Retardant

Adhesive Clips

- Fasten Micro-Cable to any Wall Surface
- Proprietary Adhesive Backing
- Removable if needed
- Will Not Damage Wall Surfaces
- Transparent Appearance
- Paintable if Desired
- Flame Retardant

Indoor Optical Outlet Box (NIU)

- Easily Installation and Maintenance
- Efficient Inner Space Design
- Suitable Fiber Bending Radius
- Provides Excellent Protection for Optical Fibers
- Fire-proof & Dust-proof
- Options for Adapter and Pigtails

Ordering Information

Part Number	Product Description
JXX4B2AM350B	Optical Fiber ILU 0.9MM350m GR

Indoor Optical Outlet Box (NIU)

Description

Indoor Optical Outlet Box (NIU), 2 ports

Features

- Easy Installation and Maintenance
- Efficient Inner Space Design
- Suitable Fiber Bending Radius
- Provides Excellent Protection for Optical Fibers
- Fire-proof & Dust-proof
- Options for Adapters and Pigtails

Applications

- Fiber-to-the Desk Applications
- Suitable for home or working areas to accomplish easy fiber access
- Suitable for end termination of residential buildings and villas, to fix and splice with pigtails.

Go!Foton Fiber Cable Assembly for Telecom, Data center and Other Applications

Go!Foton manufactures a wide variety of MPO / MTP® Patch Cords, Multifiber Fan-out / Breakouts and Simplex/Duplex Jumpers Cable Assemblies. We provide two types of performance products; Standard and Premium.

Premium and Standard Assemblies

The “Premium” Cable Assemblies provide the highest level of reliability with lower IL/RL. These assemblies have also passed VZ TPR certification. We also offer the high performance “Standard” Cable Assemblies that are Telcordia GR 326 tested and certified. Both the Premium and Standard products are made in our manufacturing facility. Our success due to the highly dedicated and skilled production team and only the highest quality fiber and connector components on the market.

MPO / MTP® Patch Cords

Our Multi-fiber jumpers and loopbacks deliver the performance and reliability needed in today's demanding high-speed broadband and data networks. GoFoton's MPO/MTP® jumpers utilize precision ferrules, precise housing dimension and metal guide pins to ensure accurate fiber positioning when mating. This results in the highest possible optical performance.

The “Premium” MPO/MTP® multi-fiber jumpers, which are GR-1435 and VZ-TPR 9431 Certified, provide the highest level of reliability and are easily recognized by the yellow housing. We also offer our high performance “Standard” MPO multi-fiber jumpers that are Telcordia GR-1435 tested and certified and have green housing.

All of our MPO/MTP® jumpers, fan-outs, and loopbacks are rigorously tested and certified by Telcordia for compliance with GR-1435. In addition MPO/ MTP® Push/Pull Tabs for high density applications are available in bags of 10 pcs for both Premium and Standard jumpers.

Go!Foton now offers the new jumpers with USCONEC MPO/MTP®PRO connectors that offer quick and effective field polarity change and easy pin reconfiguration. Also available with these jumpers are the MTP®PRO Field Tool Polarity and Gender Change Kit. Download the data sheet from this website for more information.

Multi fiber Fan-out/Breakout Cables

Go!Foton's Fan-out/break-out fiber cable assemblies deliver the performance and reliability needed in today's demanding high-speed broadband and data networks. We manufacture a wide variety of single mode and multimode optical fiber jumpers for telecom and data center applications. Our state of the art manufacturing process is recognized by leading global service providers as one of the best in the industry.

Go!Foton's Fan-out/break-out cables have many variations to choose from to fit your precise applications: MPO-to-LC, MPO-to-SC, MPO-to-MPO, LC-to-LC, LC-to-SC, and more! Performance is always guaranteed since all Go!Foton cable assemblies have been tested by Telcordia for compliance with GR-1435, GR-2866, Verizon TPR 9431, IEC-61754-7 and EIA/TIA-604-5.

Simplex and Duplex Patch Cords

Go!Foton manufactures a wide variety of single mode and multimode optical fiber jumpers for telecom and data center applications.

The "Premium" Cable Assemblies provide the highest level of reliability with lower IL/RL. These assemblies have also passed VZ TPR certification. We also offer the high performance "Standard" Cable Assemblies that are Telcordia GR 326 tested and certified. Both the Premium and Standard products are made in our manufacturing facility. Our success due to the highly dedicated and skilled production team and only the highest quality fiber and connector components on the market.

Each of our valued technicians is expertly trained in assembling and polishing connectors to near perfection. With a relentless commitment to quality, we offer only products meeting and exceeding unsurpassed optical performance.

We offer different connector types for our superior performance jumpers in demanding high density applications.

MDU Drop Cables for FTTH Applications and Node Assembly Cables for MOS/CATV

Go!Foton provides Node Service Assembly cables for several years and recently provided Node Cable Assembly. Get the reliability with competitive prices and on time delivery support provided by Go!Foton with On-Time delivery.

Go!Foton Cable Assembly Features

- High reliability exceeding industry Standards.
- Every connector termination we make is 100% tested prior to shipping to confirm it meets our highest performance standards.
- Four wavelength testing ensures your jumpers will support 10G/40G/100G transmission and next generation PON deployment.
- Experienced Technical Application support
- On-Time Delivery
- Competitive Pricing

MPO/MTP® Jumper Assemblies

Description

GoFoton's MPO/MTP® multi-fiber jumpers deliver the performance and reliability needed in today's demanding high-speed broadband and data networks. GoFoton's MPO/MTP® jumpers utilize precision ferrules, precise housing dimensions, and metal guide pins to ensure fiber positioning when mating and give excellent performance. Telcordia tested it for compliance with GR-1435, Verizon TPR.9431, IEC-61754-7, and EIA/TIA-604-5. Go!Foton manufactures many single-mode and multimode optical fiber jumpers for telecom and data center applications.

Our jumper cables are fully compliant with Telcordia GR-1435-CORE. Issue 2, which requires performance characterization and testing at 1310nm, 1490nm, 1550nm, and 1625nm. Four wavelength testing ensures that your jumpers will support the demanding requirements for 10G/40G/100G transmission and next-generation PON deployment. Go!Foton jumpers will give you a solid foundation on which you build your network is capable of exceeding the ever-demanding expectations of your customers. So don't settle for second best!

Our cable assemblies may be custom configured as required for your specific applications. Our quality components and process are backed by a team of experts who know the importance of jumper cables in maintaining reliable network operations. We back up all of our claims with product performance testing and auditing our manufacturing facility by Telcordia Technologies.

Features

- Every connector termination we make is 100% tested prior to shipping to confirm that it meets our highest performance standards.
- Four wavelength testing ensures that your jumpers will support the demanding requirements for 10G/40G/100G transmission and next generation PON deployment.
- All jumpers are free of hazardous substances in compliance with RoHS 2002/95/EG
- Verizon TPR-9431, IEC-61754-7 and EIA/TIA- 604-5 Compliant, Telcordia GR-1435-CORE Tested

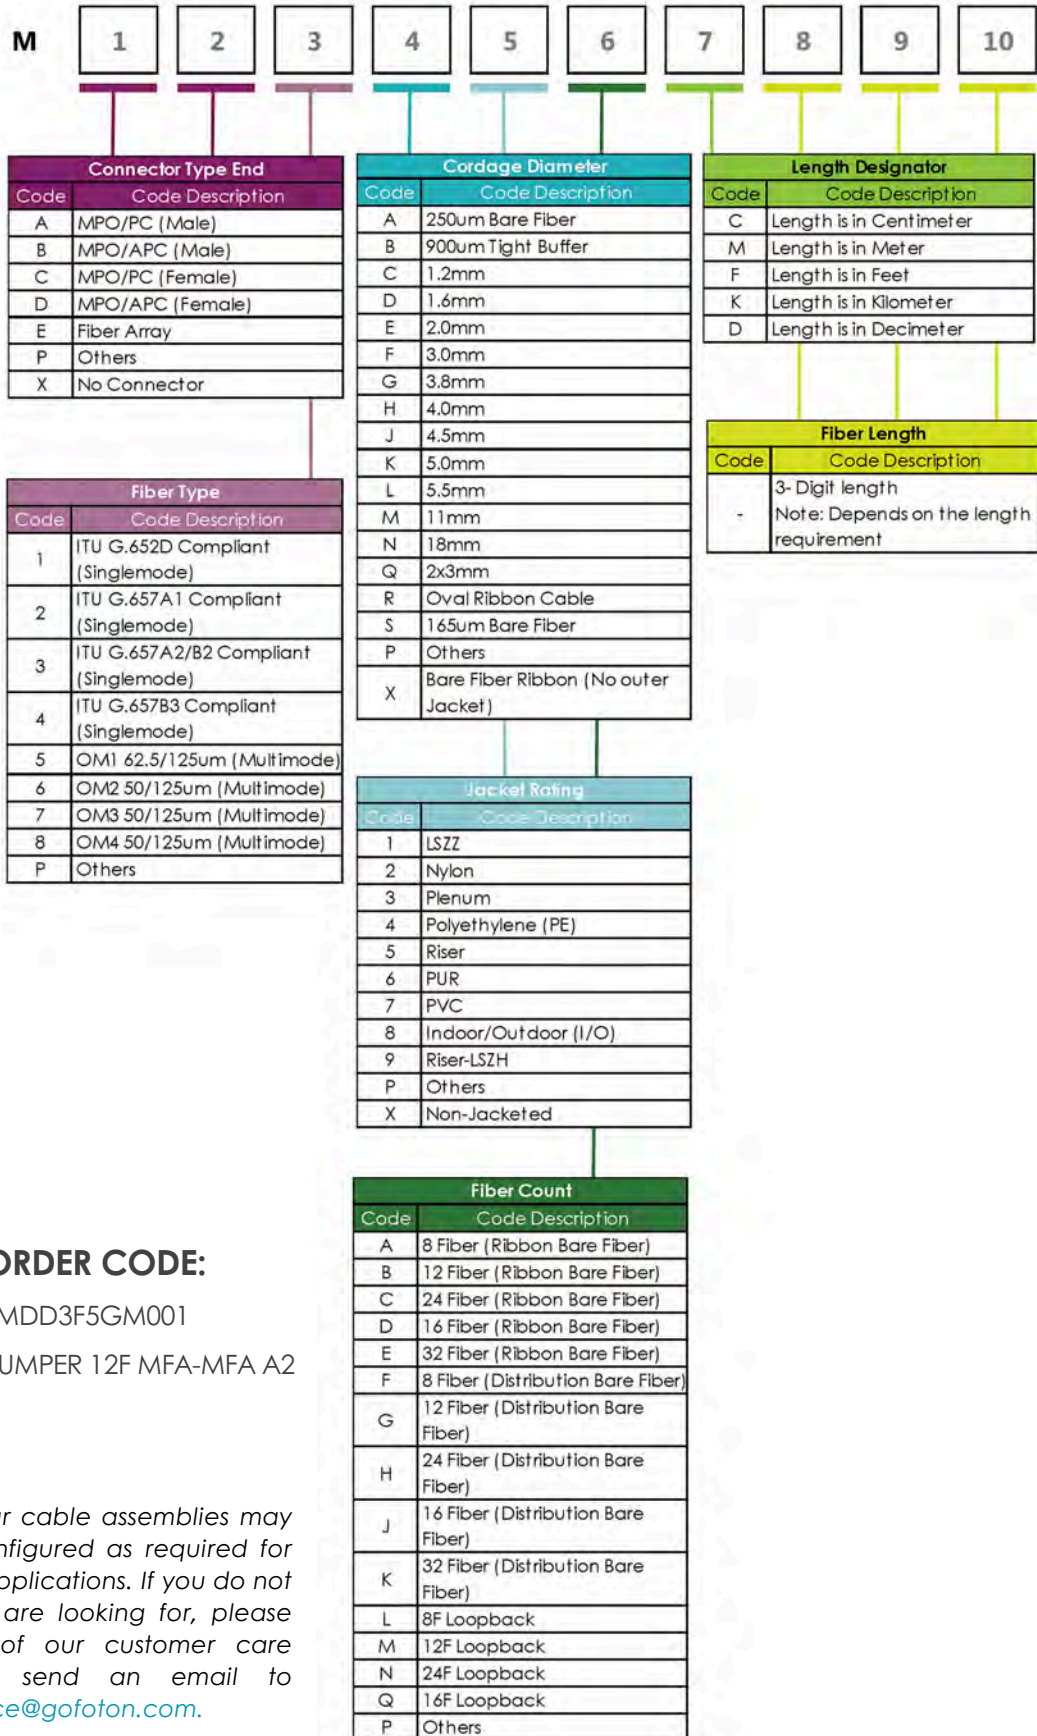

Applications

- Telecommunication Networks
- Data Communication Networks
- Optical System Access Networks
- Broadband / CATV Networks
- Equipment / Switch Interconnections

Specifications

Parameter	Type	Specification
Operating Wavelength	Single Mode	1310nm & 1550nm
	Multi-mode	850nm & 1300nm
Insertion Loss	Single Mode	IL 0.35dB (max)
	Multi-mode	IL 0.35dB (max)

12F/24F MTP® Pro Jumpers and Field Tool

Description

GoFoton's multi-fiber jumpers using USCONEC MTP® PRO connector is an improved MPO patchcord that are engineered for easy polarity change on field without re-termination and no connector housing removal that do not exposed fiber. This optical jumper also has available MTP® PRO Pin Change Tool that helps in quick pin change and avoid handling of loose pins. GoFoton's MTP® PRO patchcord was tested by Telcordia for compliance with GR-1435. All jumpers are free of hazardous substances in compliance with RoHS and REACH compliant.

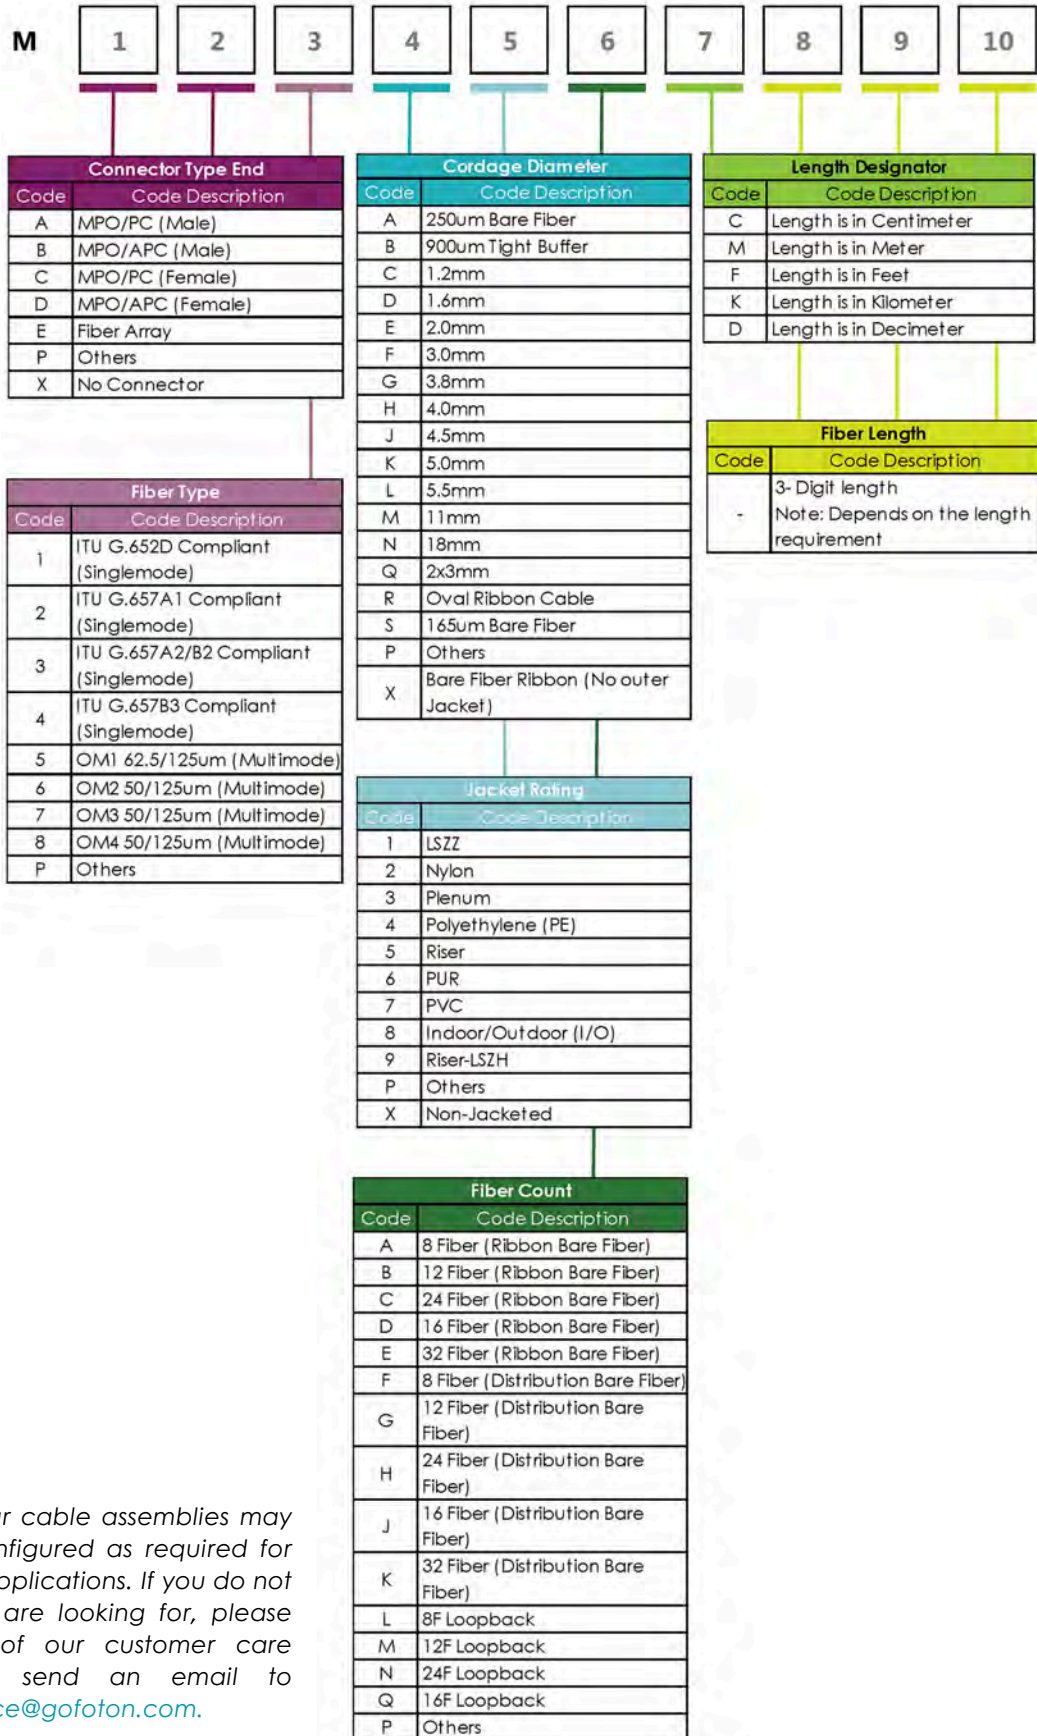

Features

- Compliant with GR-1435
- Available in push-pull boot
- Quick polarity change by reversing the MPO key using MTP® PRO Pin Change Tool
- Ease of polarity confirmation with ID marks
- With color coded reusable pin exchanger without handling of loose pins
- Exceed 19.6N IEC pin retention requirement
- MTP® PRO connector surpassed IEC 61754-7 and TIA FOCIS 5
- Compatible to standard MPO adapters

Applications

- Telecommunication Networks
- Data Communication Networks
- Optical System Access Networks
- Broadband / CATV Networks
- Equipment / Switch Interconnections

Ordering Guide

NOTE: All of our cable assemblies may be custom configured as required for your specific applications. If you do not see what you are looking for, please contact one of our customer care specialists or send an email to CustomerService@gofoton.com.

MTP® Pro Field Tool

Polarity Change

Go!Foton offers USCONEC MTP® PRO field tool for polarity change. Simply inserting the MTP® PRO connector on the polarity change tool will reverse the black key while exposing the white key simultaneously that will change the jumper's polarity.

Gender Change

Using the same field tool, changing the gender was very quick. Inserting the MTP® PRO connector on the gender change port and by using pin exchanger that attach/retrieves the pin will change the gender easily.

12F/ 16F/ 24F MPO Master Jumper

Description

Go!Foton's 12F/16F/24F MPO Master Jumper is a special MPO patch cord that meets any application's ultra low loss performance. We at GoFoton would like to provide the highest quality product to our customers for their application needs. The ultra-low loss performance is made by controlling the most crucial end face geometry requirements. Go!Foton's 12F/24F MPO Master Jumper can withstand extreme environmental conditions in compliance with GR-1435-CORE Environmental Testing and ensure no degradation to its optical performance.

Features and Benefits

- Available in 8F, 12F, 16F and 24F
- Lower Insertion for applications with critical power budget management
- Well-defined polarity and continuity checking
- Complete port-to-port optical performance (Insertion Loss and Return Loss) testing.
- Highly controlled end-face geometry to improve connectors optical performance

Applications

- Telecommunication Networks
- Data Communication Networks
- Optical System Access Network
- Broadband / CATV Networks
- Equipment / Switch Interconnections

Fiber Loopbacks: MPO and LC

Description

Go!Foton's LC and MPO Loopbacks are compact and reliable assemblies that are engineered to provide return path for fiber optic signals, simulating a complete communications circuit using a single transceiver. These loopbacks provide low insertion and return loss, making them ideal for use during network test, turn up, and troubleshooting. Loopbacks are customizable depending on the network's specified configurations.

Features

- Verizon TPR-9409 and EIA/TIA-604-5 Compliant
- Telcordia GR-326-CORE and GR-1435-CORE Tested
- Plastic parts UL94V-0 compliant
- VZ-TPR-9409 and VZ-TPR-9431 compliant
- RoHS 2002/95/EG compliant
- MPO Loopbacks available in 8F, 12F and 24F
- Designed for side by side integration.
- Short Loopback design (52mm) for space critical applications

Applications

- Telecommunications
- Test Transmitter Capability
- Test Receiver Sensitivity
- Network Troubleshooting
- Equipment Test and Turn up

Fiber Fan-Out / Break-Out Cable Assemblies

Description

Go!Foton's Fan-out/break-out delivers the performance and reliability needed in today's demanding high-speed broadband and data networks. GoFoton's Fan-out/Break-out has many variations to choose from (MPO-to-LC, MPO-to-SC, LC-to-SC, etc.) depending on the application. However, performance is always guaranteed since all Go!Telcordia has tested Go!Foton cable assemblies for compliance with GR-1435, GR-2866, Verizon TPR 9431, IEC-61754-7, and EIA/ TIA-604-5.

Features

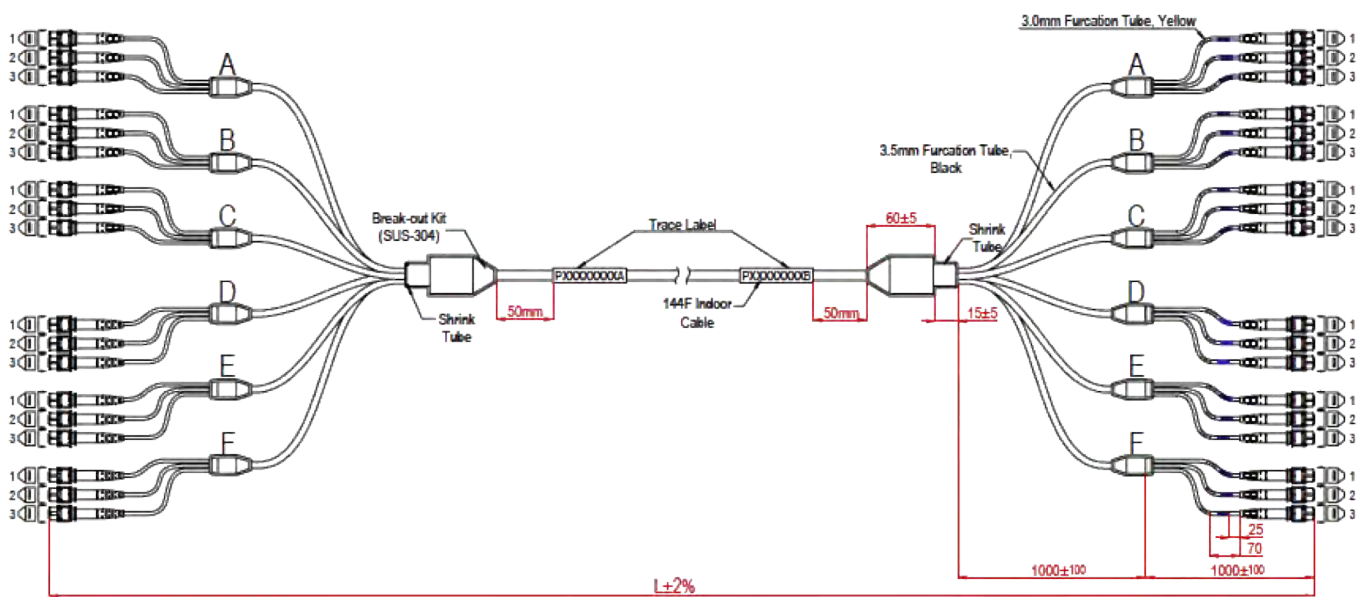

- Four wavelength testing ensures that your jumpers will support the demanding requirements for 10G/40G/100G transmission and next generation PON deployment.
- All jumpers are free of hazardous substances in compliance with RoHS 2002/95/EG
- Verizon TPR-9431, IEC-61754-7 and EIA/TIA-604-5 Compliant, Telcordia GR-1435-CORE and GR-2866 Tested

Applications

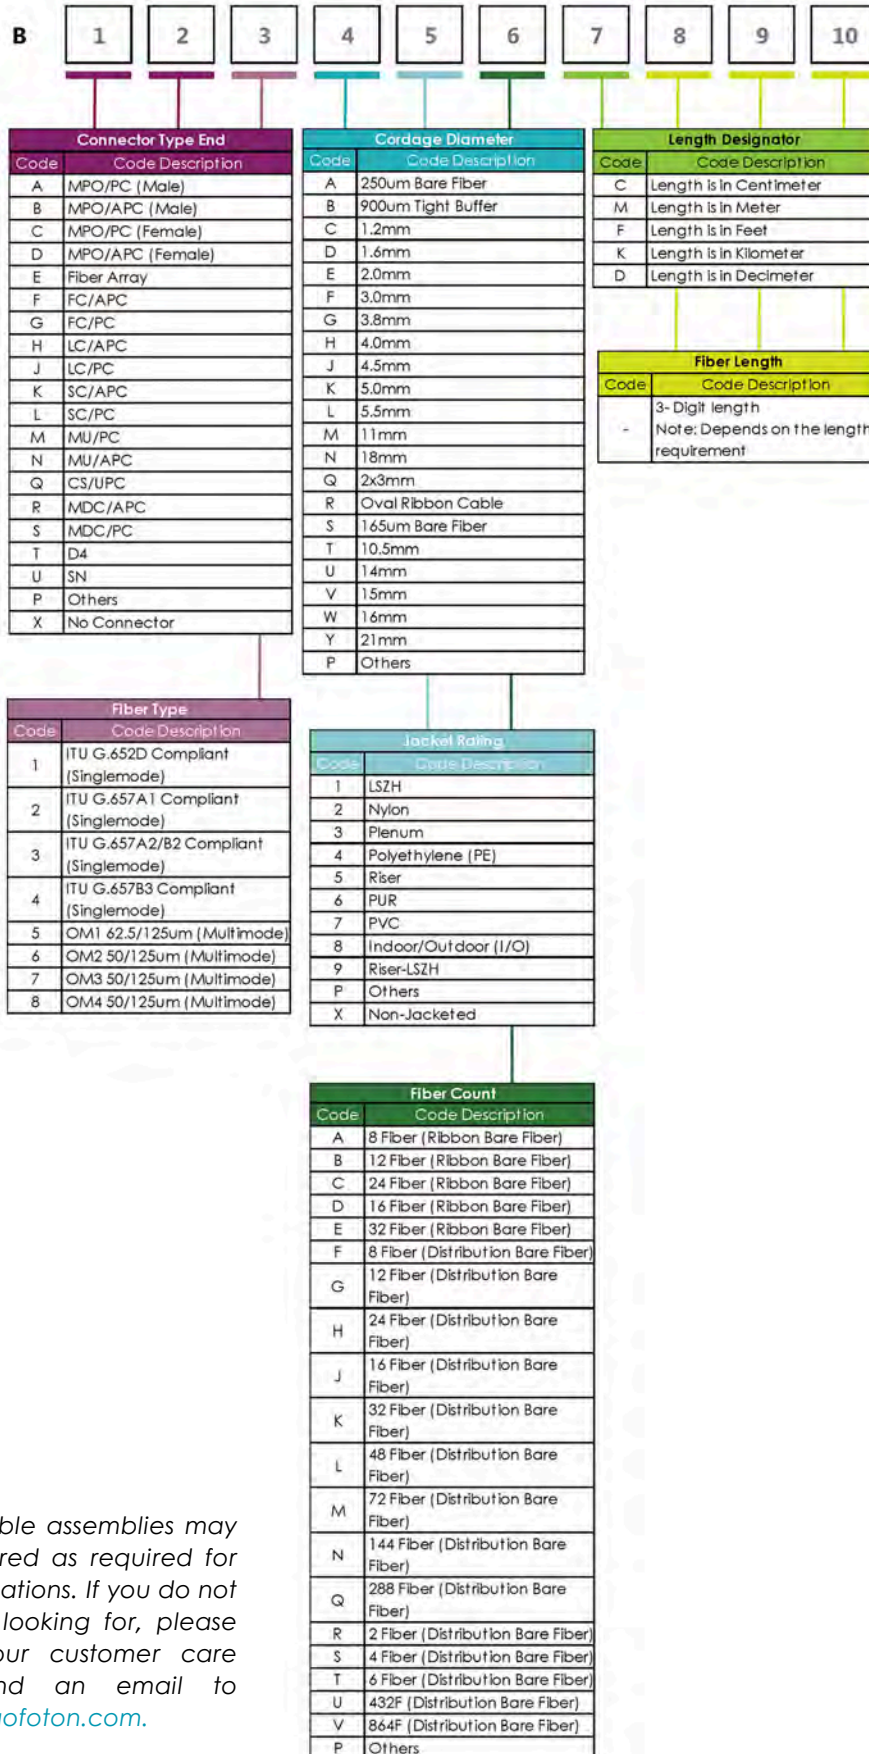

- Telecommunication Networks
- Data Communication Networks
- Optical System Access Networks
- Broadband / CATV Networks
- Equipment / Switch Interconnections
- Fiber to the Antenna (FTTA)

Simplex and Duplex Patch Cords

Description

Go!Foton manufactures a wide variety of single-mode and multimode optical fiber jumpers for telecom and data center applications. Our Cable Assemblies provide the highest level of reliability with lower IL/RL. We also offer high performance "Standard" Cable Assemblies that are Telcordia GR 326 compliant, tested, and certified. All jumpers are made in our modern manufacturing facility.

Our Success is due to highly dedicated and skilled production team and only the highest quality fiber and connector components on the market. Our quality components and quality process is backed by a team of experts who know how basic jumper cables are used to maintain reliable network operations. We back up all of our claims with product performance testing and auditing of our manufacturing facility by Telcordia Technologies.

Features:

- Every connector termination we make is 100% tested prior to shipping to confirm that it meets our highest performance standards.
- Four wavelength testing ensures that your jumpers will support the demanding requirements for 10G/40G/100G transmission and next generation PON deployment.
- All jumpers are free of hazardous substances in compliance with RoHS 2002/95/EG
- Verizon TPR-9409 Compliant
- Telcordia GR-326-CORE Tested

Applications:

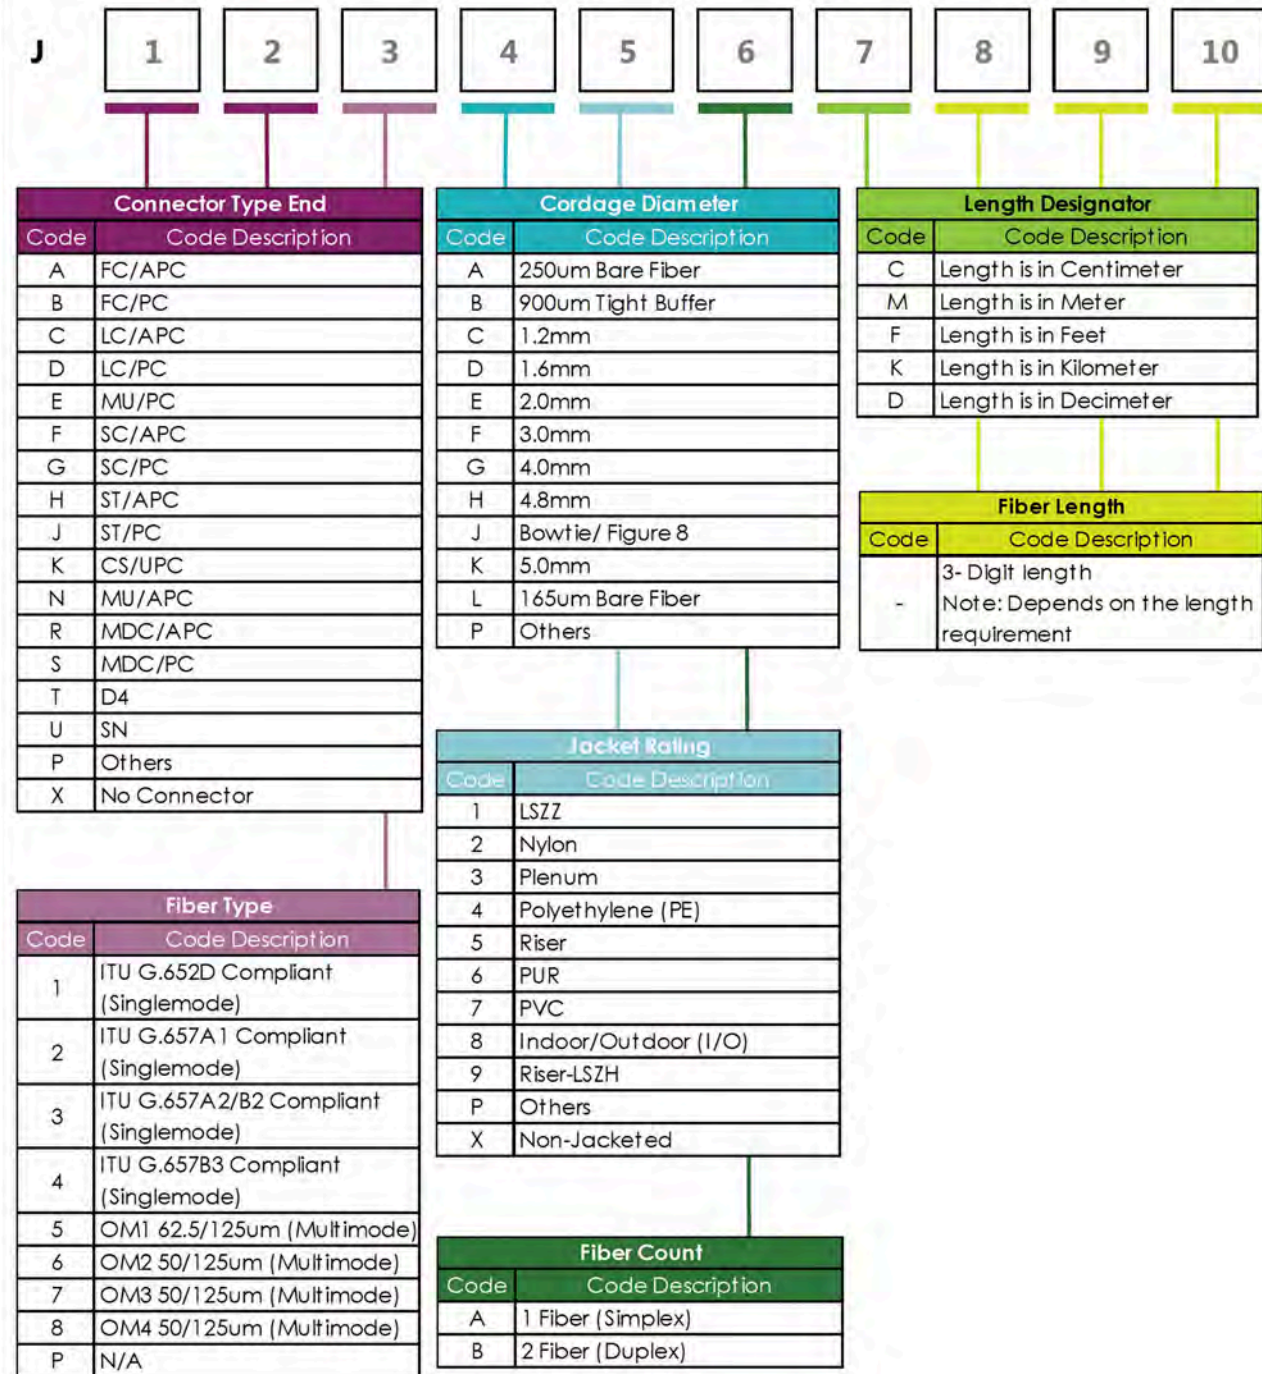

- Telecommunication Networks
- Data Communication Networks
- Optical System Access Networks
- Broadband / CATV Networks
- Equipment / Switch Interconnections

CS and LC Uniboot Duplex Optical Jumpers

Description

Go!Foton's CS (3.8mm pitch) and LC Uniboot (6.25mm pitch) Optical Jumpers are engineered and manufactured to the highest standards providing mission critical networks with worry free optical performance and superior optical fiber density. These superior quality optical jumpers are made to be highly durable exceeding industry standards for all current and next generation applications. The Go!Foton CS-CS and CS-LC Duplex Uniboot optical jumpers provide a smaller footprint to support the space-critical, fiber-dense applications emerging throughout Data center and Telecommunication networks.

Features and Benefits

- Singlemode and multimode fiber types
- CS is 40% smaller than standard LC Duplex
- Proven LC ferrule technology
- Variety of push-pull tabs available for ease of use and connector access
- 100% IL and RL tested and verified
- Controlled end-face geometry to improve connector performance.

Applications

- 200 Gbps and 400 Gbps Networks
- QSFP-DD and OSFP next gen transceivers
- High density fiber management
- Next generation switches and routers
- Wavelength selective switches
- CS-CS and CS-LC options available

MDC Sr/Jr Duplex Optical Jumpers

Description

Go!Foton's MDC (Mini Duplex Connector) Optical Jumpers are manufactured to the highest standards providing optimal stability to highly demanding applications. The MDC (3.1 mm pitch) Optical Jumper is built with high-quality fiber optic cable and belongs to Very Small Form Factor (VSFF) connectors, characterized by two 1.25 mm ferrule diameters. It features easy insertion and extraction with its push-pull boot in more confined spaces. The polarity of MDC can be effortlessly reversed without the need for tools and exposing or twisting the delicate fibers. MDC is designed to exceed industry standards for all current and next-generation applications

Features and Benefits

- Compliant with GR-326
- Very Small Form Factor (VSFF) duplex connector
- 3x fiber cable density than LC
- Push-pull boot for connector insertion and extraction
- Simple polarity reversal with no exposed fibers
- 100% IL and RL tested and verified
- Controlled end-face geometry to improve connector performance.

Applications

- QSFP-DD and SFP-DD next gen transceivers
- High density fiber management
- Data center
- Storage Area Network

Ruggedized MDU Drop Cable

Description

The Go!Foton Ruggedized MDU Drop Cable is designed for the rigorous performance needs of today's FTTH (Fiber-to-the-Home) applications. These cables incorporate the latest bend-insensitive fiber that enables worry-free installation around tight bending locations. The Ruggedized MDU Drop cable itself is designed fit installation using T-25 staples. The MDU Drop Cable comes with Telcordia GR and Verizon TPR certified SC/APC connectors that provide the high-performance return loss required for FTTx signals. The optical fiber utilized surpasses the G.657.B3 technical standards to ensure the reliability of ultra-high-speed internet and business services. Assemblies are tested and qualified to Telcordia & Verizon standard and meet all EIA.TIA 4 55-3 (FOCIS 3) interface standards for SC/APC connectors.

Features

- Pre-terminated solution for reduced installation time
- Drop Cables utilizing reduced bend radius fiber
- 2.9mm & 4.8mm ruggedized indoor and indoor/outdoor options
- Both Black and Beige (Neutral) cable colors available
- Telcordia GR-326-CORE and Verizon TPR-9409 Compliant

Applications

- Multi-Dwelling Unit (MDU) drop cables for FTTH systems
- CATV Video systems and Optical LAN Networks

Node Cable Fan-Out Assemblies

Description

Go Foton's Node Service Cable Assemblies are engineered and manufactured to simplify optical node installations. It has anti-rotating back nut and anti-twisting feed-thru body allowing tightening of node and easy mounting without twisting the cable. The mounting thread is an industry standard size of 5/8 -24 UNEF-2A. Node is an aluminum material for added strength and environmental durability. Assemblies come with weather proof and UV proof kit. This is to protect connectors and cable for a long period of time in different weather conditions.

Features and Benefits

- 100% IL and RL tested and verified
- Controlled end-face geometry to improve connector performance.
- Armored Double-jacketed Gel-free cable
- Quick and easy installation

Applications

- CATV Bidirectional Cable Drops
- FTTx optical network unit (ONU) node service drop

Return Loss

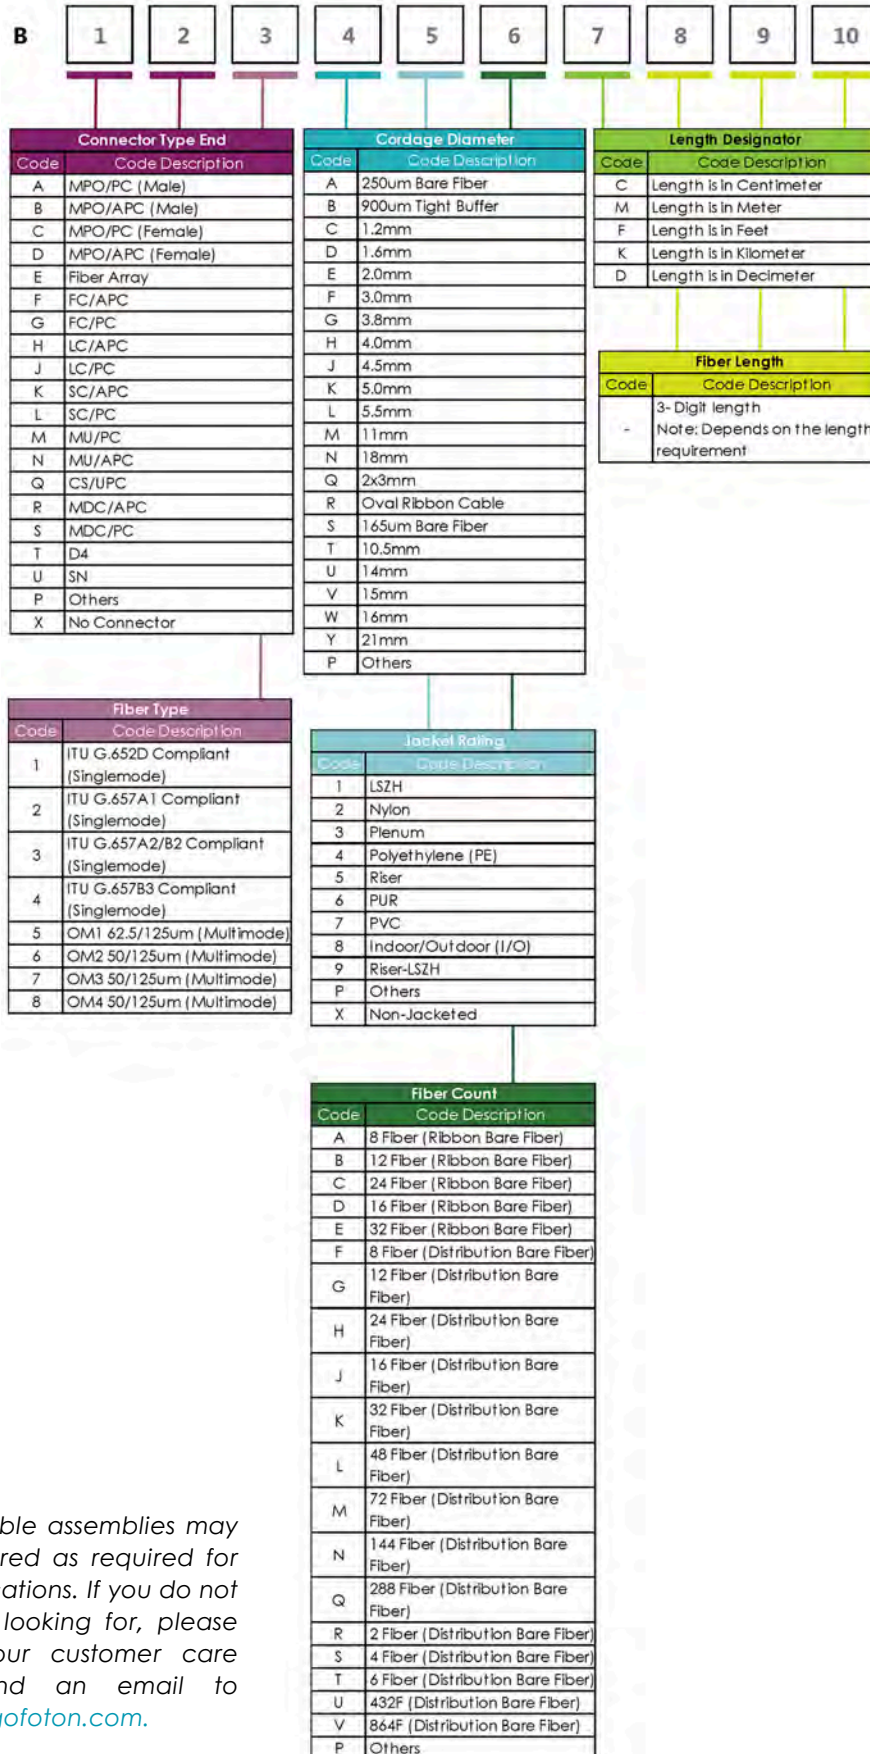

≤ 55dB typical, singlemode (UPC)

≤ 65dB typical, singlemode (APC)

Operating Temperature

-40°C to +85°C

Ordering Guide

NOTE: All of our cable assemblies may be custom configured as required for your specific applications. If you do not see what you are looking for, please contact one of our customer care specialists or send an email to CustomerService@gofoton.com.

Launch Cable

Description

Go!Foton's Launch Cable are designed to be used with an OTDR to measure complete link loss of a fiber. It consists of a single fiber with up to 1000 meter lengths which is much longer than fiber optic patch cords. These are also made with high quality and wide variety of connectors that have direct impact on the measurement results exceeding industry standards for all current and next generation applications.

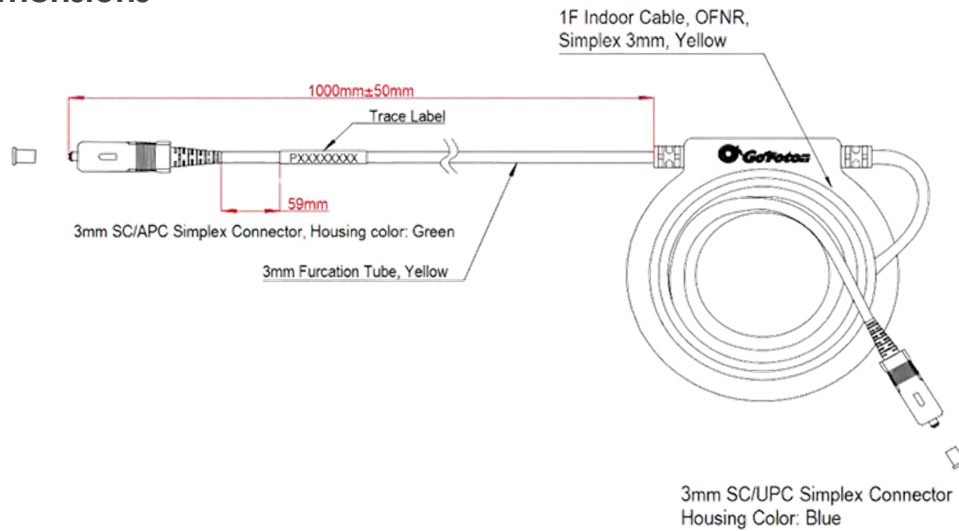

Features and Benefits

- Compact, rugged, and lightweight.
- Variety of connectors are available.
- Available up to 1000m lengths.
- 100% IL and RL tested and verified
- Controlled end-face geometry to improve connector performance.
- GR-326 compliant

Specifications

Optical	Specification
Insertion Loss	SM(PC): $\leq 0.25\text{dB}$ SM(APC): $\leq 0.35\text{dB}$ MM: $\leq 0.35\text{dB}$

1xN Planar Lightwave Circuit (PLC) Splitters

Description

Go!Foton's PLC Splitters provide high performance with very low insertion loss, excellent uniformity and temperature stability, and low PDL. They are designed for demanding requirements over a wide operating wavelength range (1260 ~ 1650nm) and are GR-1209-CORE, GR-1221-CORE specification compliant. The splitters are pigtailed with Bend-Insensitive Single Mode fiber (Bend Radius < 15mm) to achieve a robust, compact package that is durable for field handling. The splitters are available in x4, x8, x16, x32 and x64 configurations with a variety of connector choices.

Features

- Low Insertion Loss
- Low Polarization Dependent Loss
- Exceptionally Stable and Reliable
- Telcordia GR-1209 & GR-1221 Compliant
- Excellent Uniformity
- Compact

Applications

- G-PON, XGS-PON, NG-PON2, 25G-PON, & 50G-PON
- Active Ethernet
- Fiber-to-the-Premise
- Fiber-to-the-Home

- 1x64: 8 sets of 8 fiber ribbons

Ordering Guide

PLC in Blockless, Mini, and Box Configurations

Notes:

- ¹ Standard Fiber Type is ITU-T G657.A2/B2.
- ² Standard Fiber length tolerance is ±0.1meter.
- ³ All ports are with connector of the same type.
- ⁴ Only applicable for products which are not covered by the Standard Specification.

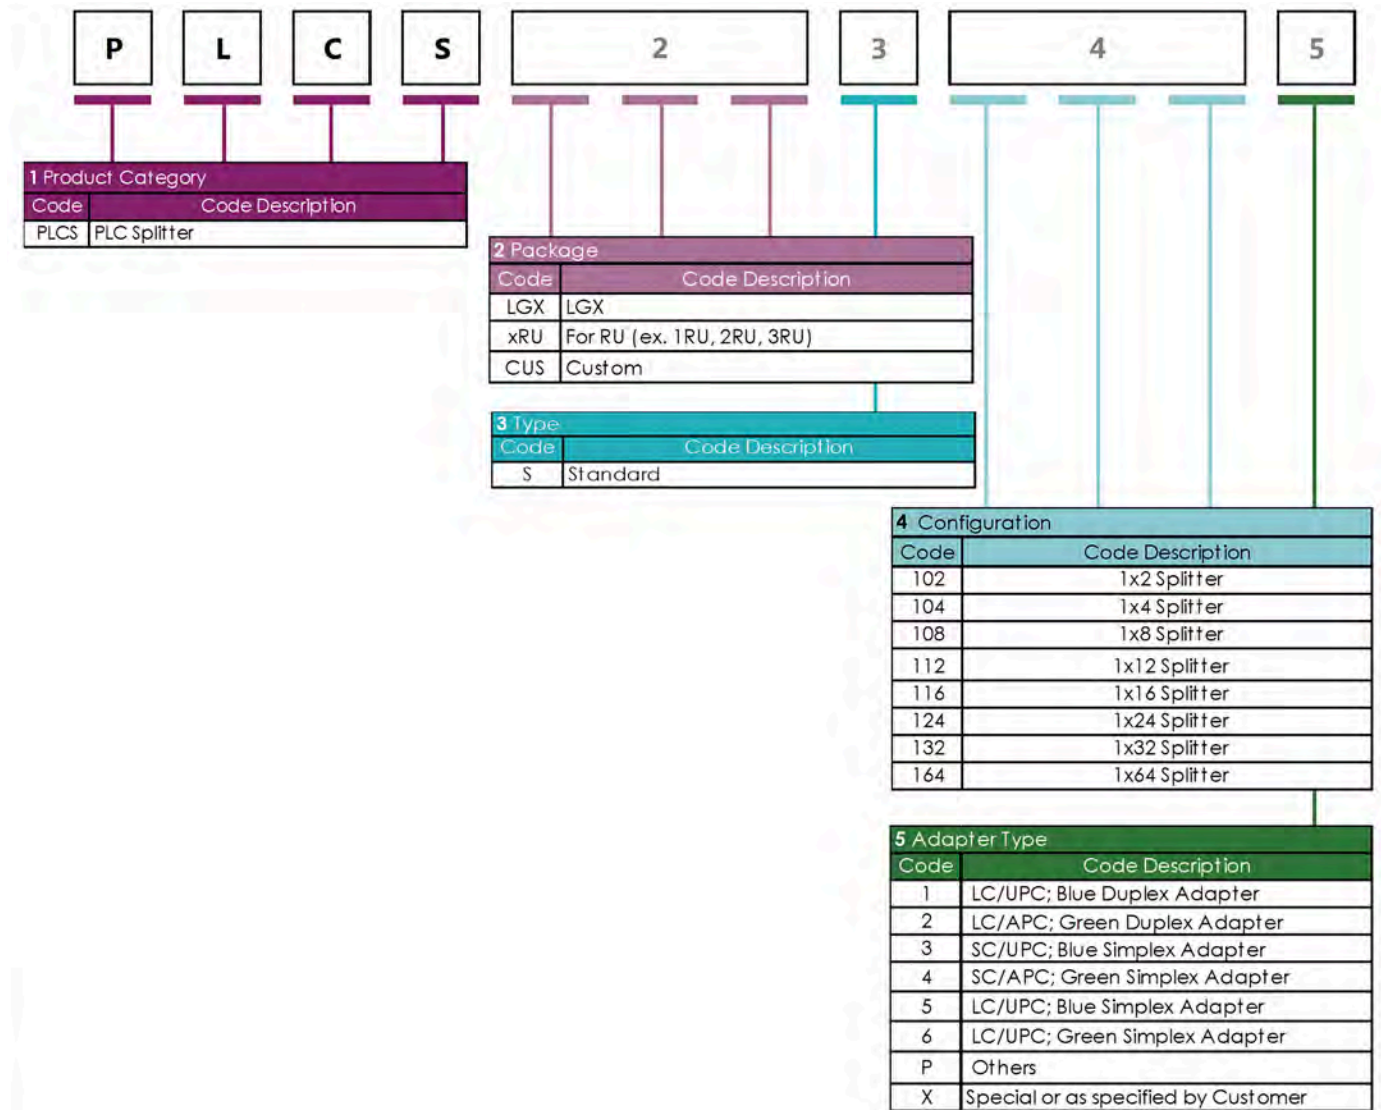

EXAMPLE ORDER CODE:

Order Code: PLCSS108M210

Description: 1X8 Standard PLC Splitter, Mini, 900um Loose Tube, one (1) meter fiber length without connectors

Ordering Guide

PLC in Enclosure Configurations

Notes:

- ¹ Standard Package Size is 1-slot for 1x4 and 1x8, 2-slot for 1x16, 3-slot for 1x32.
- ² All ports are with connector of the same type.
- ³ Only applicable for products which are not covered by the Standard Specification.

EXAMPLE ORDER CODE:

Order Code: PLCSLGXS1082

Description: 1x8 Standard PLC Splitter in LGX with LC/APC Green Duplex Adapters

Engineered TAPs in Cassette

Description

Go!Foton's engineered TAPs are efficient solutions for rural and medium density FTTH deployments. FTTH deployments in areas with low to medium subscriber density can cost significantly more per home passed than in dense urban environment. With distributed tap architecture, fiber optics taps with a linear, daisy-chain topology are used instead of centralized splitters more commonly found with a traditional FDH Cabinet. Furthermore, the distributed tap architecture allows service providers to reach considerably more subscribers while actually using less distribution fibers!

Imagine taking a fiber in a fiber optic cable, cutting it in the middle, and splicing a tap in between. The optical signal passes through the tap and continues down the fiber while the tap drops off a portion of the signal for locally-connected subscribers. Multiple taps can be placed down the line until the optical link budget is exhausted.

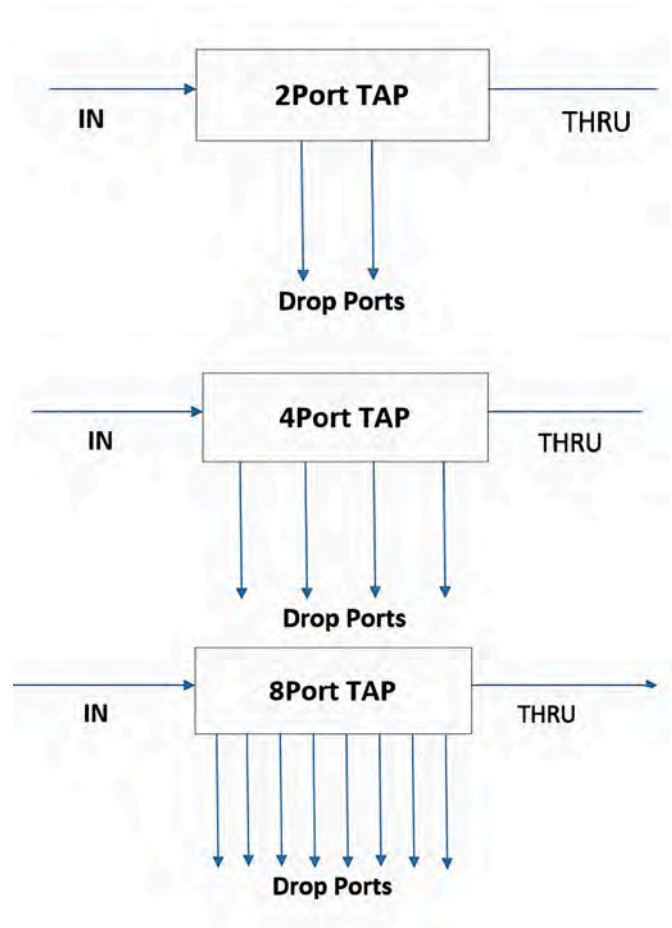

Features

- Less fiber required, same small fiber count cable can be used to pass all the homes
- Simplified design with less cable
- Lower cost and faster installation
- Certified to GR-1209/1221 Telcordia standards

Applications

- G-PON / XGS-PON / NG-PON2
- Fiber-to-the-Premise
- Fiber-to-the-Home
- Rural and Medium Density FTTH deployments

Multi-Channel CWDMs

Description

Based on Go!Foton's patented technology, SELMUX™ series is introduced to cover all TFF-based components using an all-glass platform for improved performance, such as lower insertion loss and higher thermal stability, with a competitive cost structure. Because of its high thermal stability, SELMUX series can offer compliance to Outside Plant (OSP) requirement upon request.

Go!Foton's Coarse Wavelength Division Multiplexing (CWDM) Mux and DeMux Modules are based on its unique TFF SELMUX technology that provides a high quality CWDM device with high channel isolation, low polarization dependent loss, flat and wide passband, and stable environmental performance. Go!Foton's TFF SELMUX products are epoxy-free in the optical path and are in compliance with RoHS 6/6.

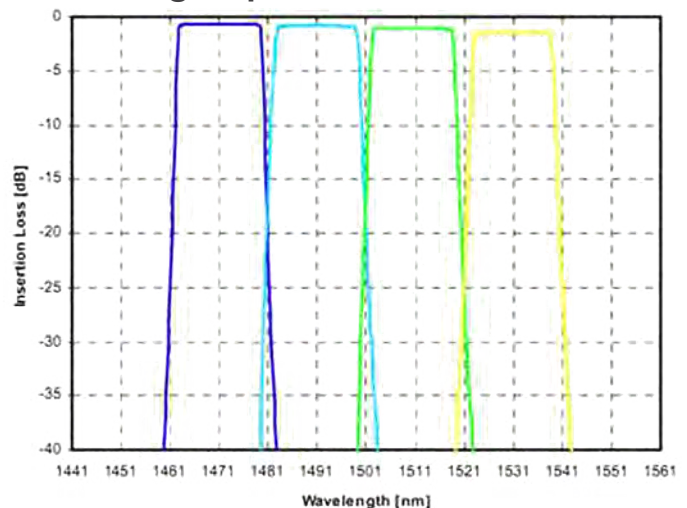

Features

- RoHS 6/6 Compliant
- Low Insertion Loss
- High Channel Isolation
- Flat and Wide Passband
- Low Polarization Dependent Loss
- Epoxy-Free Optical Path
- Exceptionally Stable and Reliable
- Telcordia GR-1209 and GR-1221 Compliant
- Thin-Film-Filter based

Applications

- CWDM Systems
- Metro/Access Network
- Enterprise Networks
- CATV Fiber Optic Links

Multi-Channel DWDMs

Description

Based on Go!Foton's patented technology, SELMUX™ series is introduced to cover all TFF-based components using an all-glass platform for improved performance, such as lower insertion loss and higher thermal stability, with a competitive cost structure. Because of its high thermal stability, SELMUX series can offer compliance to Outside Plant (OSP) requirement upon request.

Go!Foton's DWDMs, are based on TFF SELMUX technology. This technology puts Go!Foton as one of only a few companies with a unique process for tuning the center wavelength in the DWDM spectrum. Using the SELFOC technology, the process eliminates the severe manufacturing burdens placed on the thin film filter, thus simplifying center wavelength tolerances and reducing cost. Go!Foton's SELMUX products are epoxy-free in the optical path and are in compliance with RoHS 6/6.

Features

- RoHS 6/6 Compliant
- Low Insertion Loss
- High Channel Isolation
- Flat and Wide Passband
- Low Polarization Dependent Loss
- Epoxy-Free Optical Path
- Exceptionally Stable and Reliable
- Telcordia GR-1209 and GR-1221 Compliant
- Thin-Film-Filter based

Based on Go!Foton's patented technology, SELMUX™ series is introduced to cover all TFF based components using an all-glass platform for improved performance, such as lower insertion loss and higher thermal stability, with a competitive cost structure. Because of its high thermal stability, SELMUX series can offer compliance to Outside Plant (OSP) requirement upon request.

Go!Foton's WDM module or coexistence element (CEx) Modules are based on its unique TFF SELMUX technology that provides a high quality CWDM device with high channel isolation, low polarization dependent loss, flat and wide passband, and stable environmental performance. Go!Foton's TFF SELMUX products are epoxy-free in the optical path and are in compliance with RoHS 6/6. Also, WDM module or coexistence element (CEx) designed to enable the implementation of PON access network evolution such as XGS-PON and NG-PON2.

Features

- RoHS 6/6 Compliant
- Low Insertion Loss
- Flat and Wide Passband
- Low Polarization Dependent Loss (Both Signal and Tap Ports)
- Epoxy-Free Optical Path
- Exceptionally Stable and Reliable
- Telcordia GR-1209 and GR-1221 Compliant
- Thin-Film-Filter based

Applications

- FTTH Systems
- Metro/Access Network
- Data Center
- Telecom Central Office
- CATV Headend + OSP Cabinets

Wavelength Spectrum

Specifications

Parameter	Unit	Specification
Wavelength Range	COM/ODN	1260-1645
	XGS <-> COM/ODN	1260-1280 / 1575-1581

1x2 Single Channel CWDMs

Description

Based on Go!Foton's patented technology, SELMUX™ series is introduced to cover all TFF-based components using an all-glass platform for improved performance, such as lower insertion loss and higher thermal stability, with a competitive cost structure. Because of its high thermal stability, SELMUX series can offer compliance to Outside Plant (OSP) requirement upon request.

Go!Foton's Coarse Wavelength Division Multiplexing (CWDM), is based on Go!Foton's unique TFF SELMUX technology that provides a high quality CDWM device with high channel isolation, low polarization dependent loss, flat and wide passband, and stable environmental performance.

Features

- Low Polarization Dependent Loss
- Exceptionally Stable and Reliable
- Telcordia GR-1209 and GR-1221 Compliant
- Flat and Wide Passband
- Epoxy- Free Optical Path
- High Channel Isolation
- Thin-Film-Filter based
- RoHS 6/6 Compliant
- Low Insertion Loss

Applications

- Coarse WDM Systems
- Metro Access Networks
- CATV Fiber Optic Links
- Access/ Enterprise Networks

1x2 Single Channel DWDMs

Description

Based on Go!Foton's patented technology, SELMUX™ series is introduced to cover all TFF-based components using an all-glass platform for improved performance, such as lower insertion loss and higher thermal stability, with a competitive cost structure. Because of its high thermal stability, SELMUX series can offer compliance to Outside Plant (OSP) requirement upon request.

Go!Foton's DWDMs, are based on Go!Foton's patent pending technology. This technology puts Go!Foton as one of only few companies with a unique process for tuning the center wavelength in the DWDM spectrum. Based on NSG's unique SELFOC technology, the process eliminates the severe manufacturing burdens placed on the thin film filter, thus simplifying center wavelength tolerances and reducing cost. Go!Foton's SELMUX products are epoxy-free in the optical path and are in compliance with RoHS 6/6.

Features

- Low Polarization Dependent Loss
- Exceptionally Stable and Reliable
- Telcordia GR-1209 and GR-1221 Compliant
- Flat and Wide Passband
- Epoxy- Free Optical Path
- High Channel Isolation
- Thin-Film-Filter based
- RoHS 6/6 Compliant
- Low Insertion Loss

Applications

- Dense WDM Systems
- Metro Networks
- Access/ Enterprise Networks
- Long Haul Networks
- CATV Fiber Optic Links

High Isolation Edge WDM (EWDM) for PON

Description

Go!Foton's High Isolation EWDM is ideal for FTTx and B-PON/ G-PON applications. This coupler is based on Go!Foton's new SELMUX™ patented technology which optimizes glass, epoxy and Filter-on-Lens (FOL) technologies to create a High Isolation 3-port EWDM device with low PDL, low insertion loss and stable environmental performance in a compact size. Because of this revolutionary technology, Go!Foton's High Isolation EWDM are one of the smallest packaging sizes available in the market today. All SELMUX products have eliminated soldering in the manufacturing process so they are completely lead-free and comply with EU directives on Restriction of Hazardous Substances or RoHS.

Features

- ITU Recommended Wavelength Grid
- High Isolation
- Telcordia GR-1209 and GR-1221 Compliant
- Low Polarization Dependent Loss
- Low Insertion Loss
- Flat and Wide Passband
- Epoxy- Free Optical Path
- Exceptionally Stable and Reliable
- RoHS Compliant (Lead Free)

Applications

- B-PON/ G-PON/ E-PON/ Ge-PON
- Fiber-to-the-Premise
- Fiber-to-the-Home

Thin Film Filter 1x2 Tap Coupler Single Mode

Description

Go!Foton's Single Mode TFF Tap Coupler is a compact, Thin-Film- Filter based, and low signal loss component designed for splitting signal wavelength. This device is ideal for CATV systems and telecommunications, and provide low insertion loss with high reliability. Reliability is guaranteed to fully meet Telcordia GR-1221 requirements.

Features

- ITU Recommended Wavelength Grid
- Telcordia GR-1221 Compliant
- Low Polarization Dependent Loss
- Low Insertion Loss
- Flat and Wide Passband
- Epoxy- Free Optical Path
- Exceptionally Stable and Reliable
- RoHS Compliant (Lead Free)

Applications

- Fiber Distribution
- Signal Monitoring
- Power Splitting

Ordering Information

Notes

¹Standard Fiber Type is ITU-T G657.A2/B2 and G652.D Compliant Single Mode Fiber.

¹Standard Package Size is OD5.5mm x L40[49]mm for Fiber Type 1~3. For 1.2mm cable, Package Size is OD3.2mm x L65[75]mm.

³Fiber length tolerance is +/-0.1 meter for products with connector termination.

⁴All ports are with connector of the same type.

Only applicable for products which are not covered by the Standard Specification.

EXAMPLE ORDER CODE:

Order Code: TC50FW110

Description: TAP Coupler, 50% , Full band, 250um Bare Fiber, 1 meter length, no connector on all ports.

Thin Film Filter 1x2 Tap Coupler Multimode

Description

Go!Foton's Multimode TFF Tap Coupler is a compact, Thin-Film- Filter based, and low signal loss component designed for splitting signal wavelength in 850nm wavelength range. This device is ideal for CATV systems and telecommunications, and provide low insertion loss with high reliability. Reliability is guaranteed to fully meet Telcordia GR-1221 requirements.

Features

- ITU Recommended Wavelength Grid
- Telcordia GR-1221 Compliant
- Low Insertion Loss
- Epoxy- Free Optical Path
- Exceptionally Stable and Reliable
- RoHS Compliant (Lead Free)

Applications

- Fiber Distribution
- Signal Monitoring
- Power Splitting

Thin-Film PM Tap Couplers

Description

Go!Foton's TFF Polarization Maintaining (PM) Tap Coupler is a compact, Thin-Film- Filter based, and low signal loss component designed for splitting signal wavelength. TFF PM Couplers are manufactured using PANDA fiber which allows them to maintain a high polarization extinction ratio (PER) when light is launched along the fast axis of the fiber. This device is ideal for CATV systems and telecommunications, and provide low insertion loss with high reliability. Reliability is guaranteed to fully meet Telcordia GR-1209 and GR-1221 requirements.

Features

- ITU Recommended Wavelength Grid
- Telcordia GR-1209 and GR-1221 Compliant
- Low Insertion Loss
- High Polarization Extinction Ratio
- Epoxy- Free Optical Path
- Exceptionally Stable and Reliable
- RoHS Compliant (Lead Free)
- Small Packaging Dimension

Applications

- Fiber Distribution
- Signal Monitoring
- Power Splitting

Parameter	Unit	Port	Specification
Fiber Type	-	All	Panda PM Fiber R> 15mm;
Port Identification	-	P1	None
		P2	None
		P3	None
Package Size (Cylindrical Metal Housing)	mm	-	Φ3.0xL30

Ordering Guide

EXAMPLE ORDER CODE:

Order Code: TC1250S2XX0

Description: TAP Coupler, 1X2, 50%, Single Window 1550nm, 250µm Bare Fiber PM PANDA, 600mm length, no connector on all ports.

Gain Flattening Filter

Description

Go!Foton's Gain Flattening Filter (GFF) is a Thin-Film Filter based and low signal loss component designed to flatten or smooth out unequal signal intensities over a specified wavelength range. GFF is characterized by low peak-to-peak error function (PPEF) which determines the maximum flatness of the transmitted signal. This device is ideal for CATV systems and telecommunications, and provide low insertion loss with high reliability. Reliability is guaranteed to fully meet Telcordia GR-1221 requirements.

Features

- ITU Recommended Wavelength Grid
- Telcordia GR-1209 and GR-1221 Compliant
- Low Insertion Loss
- Low Peak-to-Peak Error Function
- Customized gain flattening profiles
- Epoxy- Free Optical Path
- Exceptionally Stable and Reliable
- RoHS Compliant (Lead Free)

Applications

- Fiber Optic Amplifiers (EDFA and/or Raman)

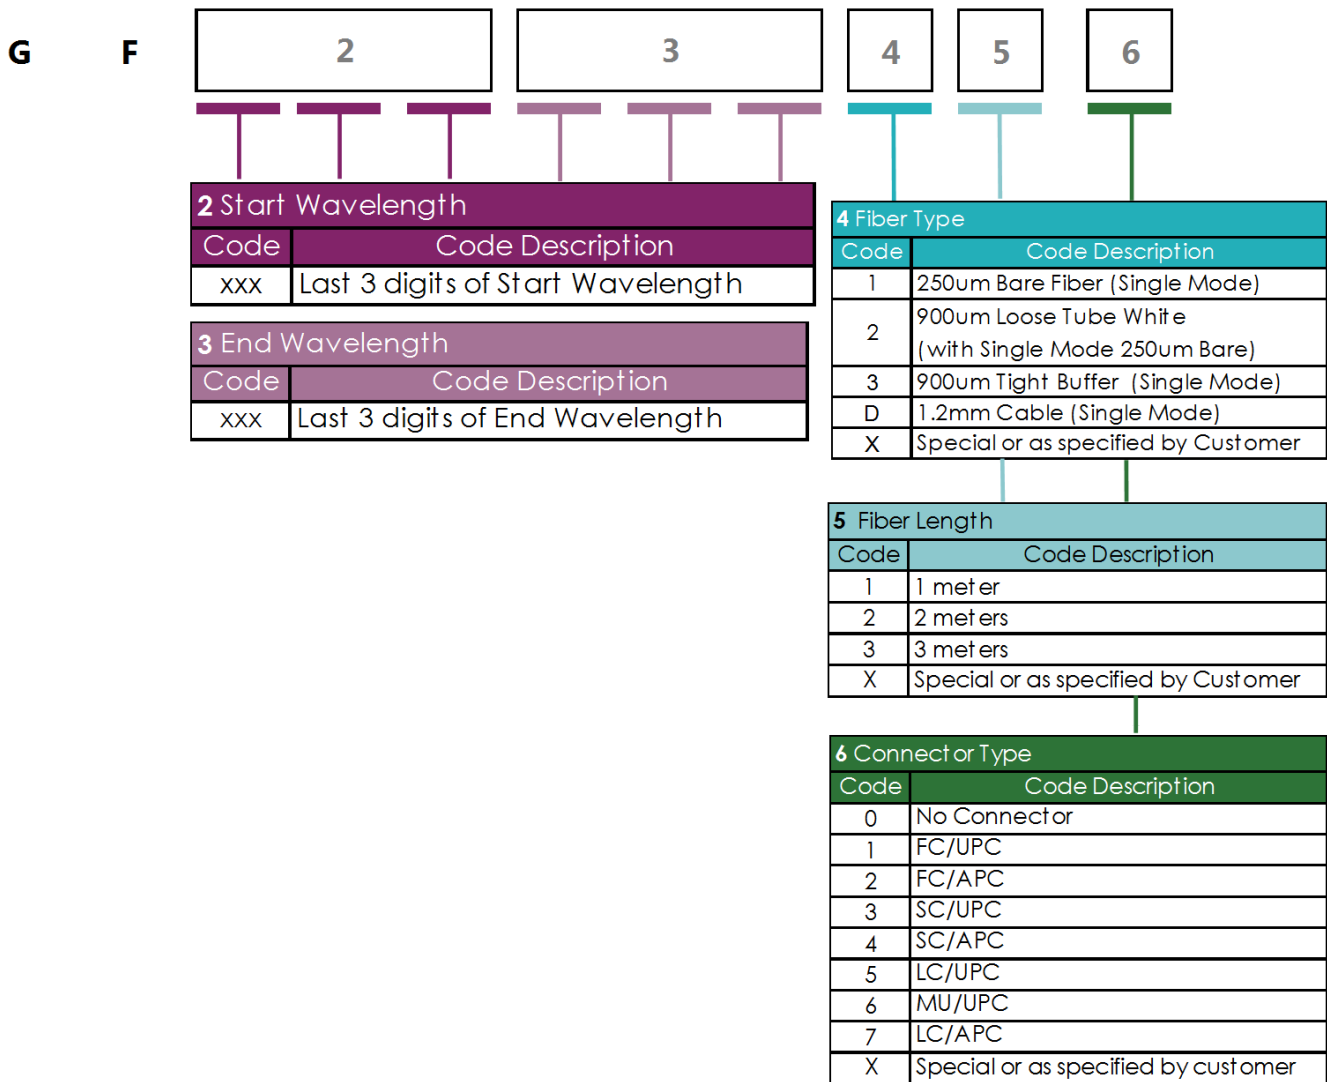

Optical Characteristics

Parameter	Unit	Port	Specification
Operating Wavelength Range ¹	nm	WL	All 1528-1545
Minimum Insertion Loss (Peak IL) ¹	dB	IL	P1→P2 ≤0.8
Peak-to-Peak Error Function	dB	PPEF	P1→P2 ≤0.6
Polarization Dependent Loss	dB	WDL	All ≤0.3
Return Loss	dB	RL	All ≥50
Maximum Optical Power Handling	mW	P	All 500
Operating Temperature	°C	T _{OP}	All -40~+85
Operating Humidity Range	%RH	RH _{OP}	All +5~+85

Mechanical Specifications

Parameter	Unit	Port	Specification
Fiber Type	-	All	ITU G657A2/B2 and G652D Compliant Fiber
Port Identification	-	P1 P2	Black Mark (100 ± 500mm) None
Package Size (Cylindrical Metal Housing)	mm	-	Ø5.5xL40

Ordering Guide

EXAMPLE ORDER CODE:

Order Code: GF528545110

Description: GFF, 1528nm Start Wavelength, 1545nm End Wavelength, 250µm Bare Fiber, 1 meter length, no connector on all ports.

In-Line Optic Filter Mirror Cable Assembly (IOCA)

Description

Go!Foton's In-Line Optic Filter Mirror Cable Assembly (IOCA) uses Thin Film Filter coating technology and Go!Foton's SELMUX patented technology to allow reflection of optical signal at the UL band. This product offers very wide operation spectrum bandwidth, high isolation and low insertion loss which is ideal for PON testing. The compact, cylindrical, and cabled connector jumper package allows it to be easily connected with ONT equipment port or inserted in between ONTs and OLTs.

Features

- ITU Recommended Wavelength Grid
- Telcordia GR-1209 and GR-1221 Compliant
- Low Insertion Loss
- Low Peak-to-Peak Error Function
- Customized gain flattening profiles
- Epoxy- Free Optical Path
- Exceptionally Stable and Reliable
- RoHS Compliant (Lead Free)

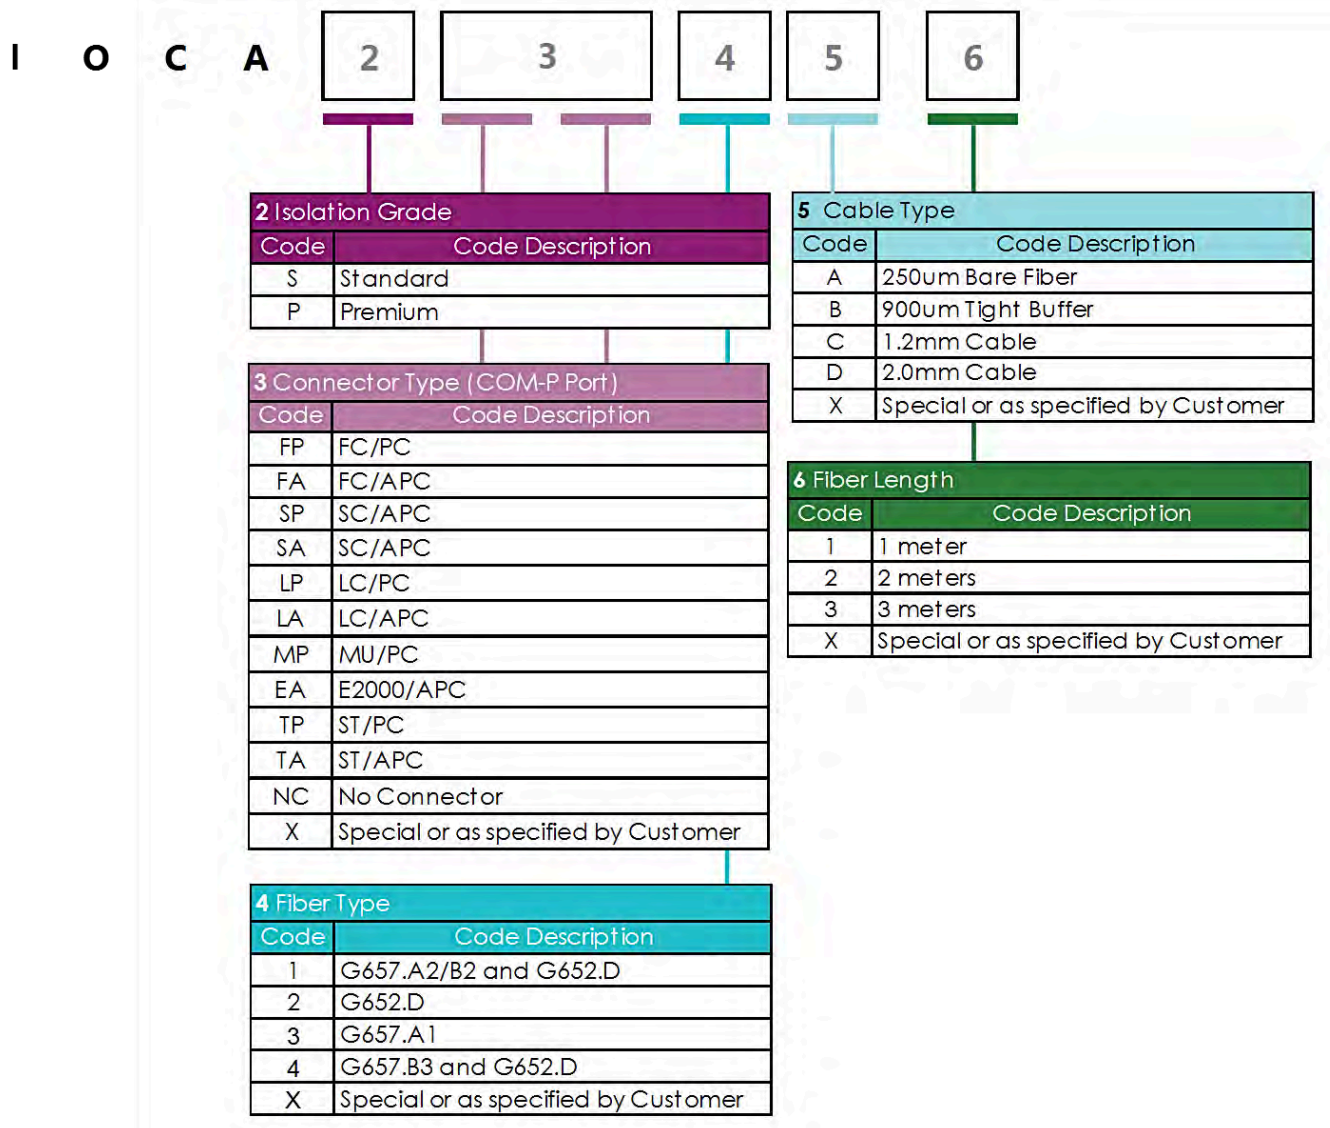

Applications

- Fiber Optic Amplifiers (EDFA and/or Raman)

Specifications

Parameter	Unit	Specification		
Operating Wavelength Range	nm	1260~1675		
Pass Channel Wavelength Range	nm	1260~1618		
Reflection Channel Wavelength Range	nm	1639~1675		
		Standard	Premium	
Pass Channel Insertion Loss	dB	≤1.0	≤1.0	
Reflection Channel Insertion Loss	dB	≤1.5	≤1.5	
Wavelength Dependent Loss	dB	≤0.5	≤0.5	
Pass Channel Isolation	dB	≥40 @ Λ_R	≥55 @ Λ_R	
Reflection Channel Isolation	dB	≥20 @ Λ_P	≥40 @ Λ_P	
Polarization Dependent Loss	dB	All	≤0.20	≤0.20
Maximum Optical Power Handling	mW	All	500	
Operating Temperature	°C	All	-40~+85	
Operating Humidity Range (No Condensation)	%RH	All	+5~+85	
Storage Temperature Range	°C	All	-40~+85	

Ordering Guide

EXAMPLE ORDER CODE:

Order Code: IOCAPLPLP1D1

Description: IOCA, Premium Grade, LC/PC Connector on COM and P Port, G657.A2/B2 and G652.D Compliant Fiber, 2mm Cable, 1 meter length.

Single Window Fused Tap Coupler

Description

Go!Foton's Single Window Fused Tap Coupler can be used to split light from one fiber to two fibers or to combine light from two fibers to one and provide high performance across a broad wavelength. These devices are ideal for CATV systems and telecommunications, and provide low insertion loss with high reliability.

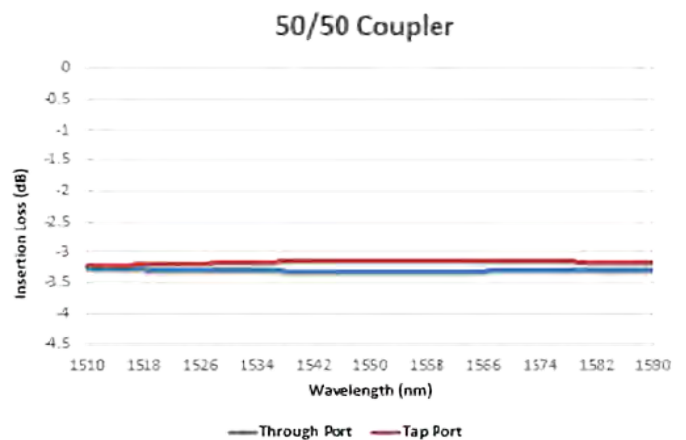

Features

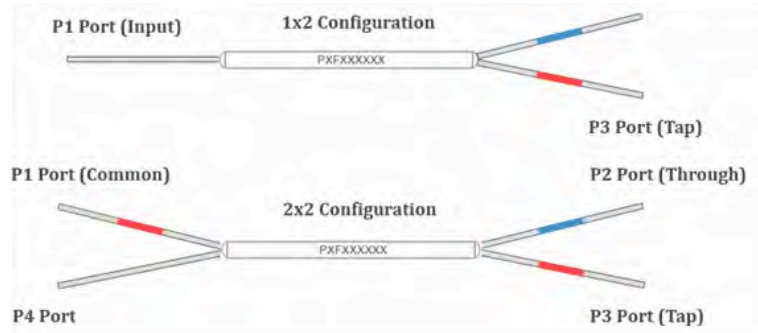

- Telcordia GR-1209 and GR-1221 Compliant
- Low Insertion Loss
- Low PD
- Low Excess Loss
- Wide Operating Temperature Range

Applications

- Optical Fiber Distribution
- Signal Monitoring
- Optical Test System
- Power Splitting

Schematic and Wavelength Spectrum

Specifications

Specifications		Splitting Ratio 50/50		
Parameter		Unit	Premium	Grade A
Center Wavelength		nm	1310 and 1550	
Bandwidth		nm	±40	
Insertion Loss ¹	Max	dB	3.4	3.6
Uniformity ²	Max	dB	0.6	0.8
Polarization Dependent Loss	Max	dB	0.15	0.15
Directivity	Min	dB	55	
Return Loss	Min	dB	50	
Power Handling Capacity	Max	mW	500	
Operating Temperature		°C	-40 to 85	
Storage Temperature		°C	-40 to 85	
Fiber Type			ITU-T G657.A1 Compliant Single Mode Fiber	
Package Dimension		mm	φ3.0x45 for 250um Bare Fiber φ3.0x65 for 900um Loose Tube	

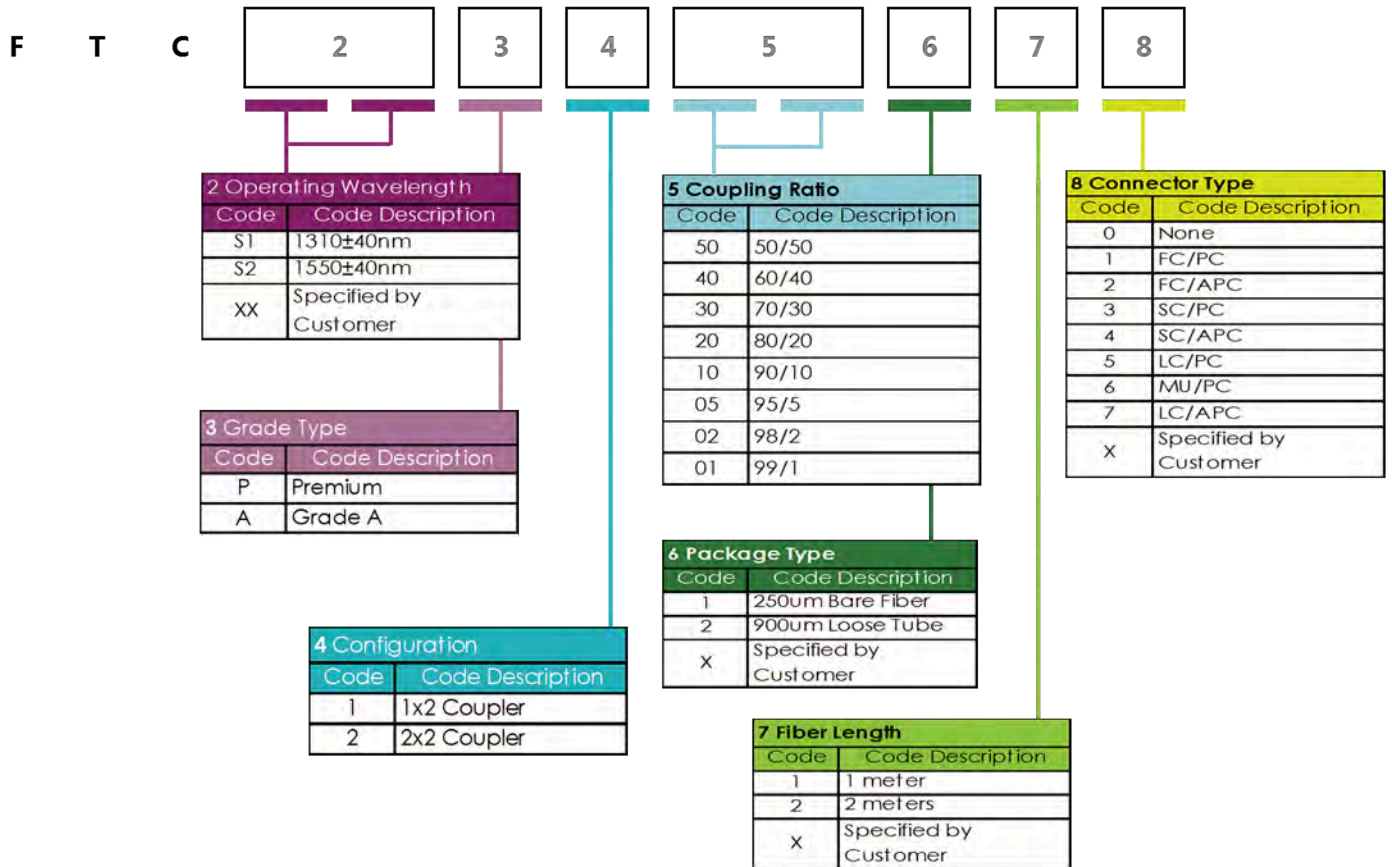

Notes:

1. Values are reference without connectors.
2. Parameter used for 50/50 tap coupler only and other parameters are applicable also to different coupling ratio.

Coupling Ratio and Insertion Loss Table

Coupling Ratio	Maximum Insertion Loss (dB)			
	Premium		Grade A	
	Output Port 1	Output Port 2	Output Port 1	Output Port 2
50:50	3.4	3.4	3.6	3.6
60:40	2.5	4.4	2.8	4.6
70:30	1.8	5.6	2.0	6.0
80:20	1.2	7.4	1.3	7.7
90:10	0.6	10.8	0.7	11.2
95:5	0.4	14.0	0.5	15.4
98:2	0.2	19.0	0.3	19.5
99:1	0.2	21.5	0.3	22.0

Ordering Guide

Notes:

1. See Package Dimension in Table above specification for Package Standard
2. The mechanical fiber length tolerance is ± 0.1 meters.
3. All ports are with connector of same type.
4. Only applicable for products which is not covered by standard specifications.

Dual Window Fused Tap Coupler

Description

Go!Foton's Dual Window Fused Tap Coupler can be used to split light from one fiber to two fibers or to combine light from two fibers to one and provide high performance across a broad wavelength. These devices are ideal for CATV systems and telecommunications, and provide low insertion loss with high reliability.

Features

- Telcordia GR-1209 and GR-1221 Compliant
- Low Insertion Loss
- 1310nm and 1550nm operation
- Low PDL
- $\pm 40\text{nm}$ Bandwidth in each window

Applications

- Optical Fiber Distribution
- Signal Monitoring
- Optical Test System
- Passive Optical Network
- Power Splitting

Schematic and Wavelength Spectrum

Specifications

Specifications		Splitting Ratio 50/50

Coupling Ratio and Insertion Loss Table

Coupling Ratio	Maximum Insertion Loss (dB)			
	Premium		Grade A	
	Output Port 1	Output Port 2	Output Port 1	Output Port 2
50:50	3.3	3.6	3.9	3.9
60:40	2.7	4.7	2.9	5.0
70:30	1.9	6.0	2.1	6.4
80:20	1.2	7.9	1.4	8.3
90:10	0.6	11.3	0.8	12.7
95:5	0.4	14.6	0.5	15.9
98:2	0.3	19.8	0.4	21.0
99:1	0.3	23.5	0.4	24.0

Ordering Guide

Notes:

1. See Package Dimension in Table above specification for Package Standard
2. The mechanical fiber length tolerance is ± 0.1 meters.
3. All ports are with connector of same type.
4. Only applicable for products which is not covered by standard specifications.

EXAMPLE ORDER CODE:

Order Code: FTCDP150115

Description: Fused Tap Coupler, Dual Window, Premium Grade, 1x2 configuration of 50/50 coupling ratio, 250um Single Mode Bare Fiber, 1 meter with LC/UPC termination

Wavelength Division Multiplexer (WDM) Fused Coupler

Description

Go!Foton's Fused WDM couplers are designed for multiplexing and demultiplexing two wavelengths. These versatile, mux and demux products are based on Go!Foton Fused Biconical Taper Fiber Technology. This proven technology produces highly quality 3-port devices with low PDL, low insertion loss and stable environment performance.

Features

- Low Insertion Loss
- High Isolation
- High Directivity
- Low PDL
- Bi-directional
- Epoxy-Free Optical Path
- Exceptionally Stable and Reliable
- Telcordia GR-1209 and GR-1221 Compliant

Applications

- Optical Fiber Distribution
- Telecommunications
- Local Area Network
- CATV
- Metro Network
- Subscriber Loop
